

BIOLOGICAL SCIENCE OF INSECTS

Entomology and Nematology are interdisciplinary biological sciences that focus on the study of insects, mites, ticks, spiders, nematodes, and related organisms. These creatures can have both helpful and harmful effects on food security, the environment, and the health of humans and other animals. Entomology and Nematology students study ecology, behavior, physiology, evolution, systematics, biodiversity conservation, arthropods of medical and veterinary significance, the management of insect/nematode pests, and invertebrates as models in many different fields of research, including biomedical sciences, bioinspired engineering, and biotechnology.

About this Program

- **College:** Agricultural and Life Sciences (<http://catalog.ufl.edu/UGRD/colleges-schools/UGAGL/>)
- **Degree:** Bachelor of Science
- **Specializations:** Biological Science of Insects (p. 1) | Urban Pest Management (http://catalog.ufl.edu/UGRD/colleges-schools/UGAGL/ENY_BS_UFO/ENY_BS07_UFO/)
- **Contact:** 1.855.99GATOR
- **Credits for Degree:** 120

To graduate with this major, students must complete all university, college, and major requirements.

Department Information

The Entomology and Nematology Department prepares students for exciting careers in a large variety of fields. Entomology and Nematology majors can enter medical, veterinary, or dental school; progress to graduate study in entomology, nematology, or any of several other biological sciences such as ecology and evolutionary biology, horticulture, or zoology; or move directly to a variety of careers (including industry and government positions) in fields such as pest management, agriculture, ecotourism, biosecurity, science policy, and education

Curriculum

- Beekeeping Certificate
- Combination Degrees
- Entomology and Nematology
- Entomology and Nematology Minor
- Entomology and Nematology Minor UF Online
- Landscape Pest Management Certificate
- Medical Entomology Certificate
- Pest Control Technology Certificate
- Urban Pest Management Certificate

The Department of Entomology and Nematology offers the major. Faculty within the department specialize in a diverse array of fields, including systematics and evolutionary biology, ecology, behavior, physiology, medical and veterinary entomology, genomics and molecular biology, apiculture, agricultural and urban pest management, biodiversity conservation, and more. The department has a long tradition of sending students to graduate school and professional programs (including medical, veterinary, and dental school). Given the widespread importance of insects and nematodes, there are many employment opportunities for students with a degree in Entomology & Nematology.

Biological Science of Insects

The Biological Science of Insects specialization prepares students for entry to entomological careers or to graduate school in entomology, nematology, and related biological disciplines. It provides students with a solid foundation in basic and applied insect science, and students can choose to further specialize in different subdisciplines via electives. This specialization also emphasizes undergraduate research. Students complete an Insect Research CURE (Course-based Undergraduate Research Experience) as well as at least 3 credits of supervised research under the direction of faculty in the Entomology and Nematology Department.

Coursework

In addition to these courses, students must also complete all university- and college-level requirements (e.g., General Education coursework).

A grade of C or above is required for all core and elective courses. Students must also maintain a 2.0 cumulative GPA.

Critical Tracking Courses

| Code | Title | Credits |
|--------------------------------|---|---------|
| BSC 2010 & 2010L | Integrated Principles of Biology 1 and Integrated Principles of Biology Laboratory 1 | 4 |
| BSC 2011 & 2011L | Integrated Principles of Biology 2 and Integrated Principles of Biology Laboratory 2 | 4 |
| CHM 2045 & 2045L | General Chemistry 1 and General Chemistry 1 Laboratory | 4 |
| CHM 2046 & 2046L | General Chemistry 2 and General Chemistry 2 Laboratory | 4 |
| Select one Mathematics option: | | 4-6 |
| MAC 2311 | Analytic Geometry and Calculus 1 | |
| MAC 1147 | Precalculus Algebra and Trigonometry | |
| MAC 1140 & MAC 1114 | Precalculus Algebra and Trigonometry | |

Core Requirements

| Code | Title | Credits |
|---|---|---------|
| ENY 2890C | Insect Research CURE | 3 |
| ENY 3005 & 3005L | Principles of Entomology and Principles of Entomology Laboratory | 4 |
| ENY 4161 | Insect Classification | 3 |
| ENY 4660 | Medical and Veterinary Entomology | 2 |
| ENY 4911 | Supervised Research in Entomology | 0-3 |
| Select one: | | 4 |
| MCB 2000 & 2000L | Microbiology and Microbiology Laboratory | |
| MCB 3020 & 3020L | Basic Biology of Microorganisms and Laboratory for Basic Biology of Microorganisms | |
| NEM 3002 | Principles of Nematology | 3 |
| Select one: | | 3-4 |
| PHY 2020 | Introduction to Principles of Physics | |
| PHY 2004 & 2004L | Applied Physics 1 and Laboratory for Applied Physics 1 | |
| STA 2023 | Introduction to Statistics 1 | 3 |
| Approved Applied Entomology course ¹ | | 3 |
| Approved Ecology course ¹ | | 3 |
| Approved Evolution course ¹ | | 3 |
| Approved Genetics course ¹ | | 3 |
| Approved Insect Behavior course ¹ | | 3 |

Elective Requirements

21 credits of 3000/4000-level courses in Entomology and Nematology or other biological sciences¹, subject to approval by an academic advisor in the Entomology and Nematology program.

¹ See an academic advisor in Entomology and Nematology for a list of courses that can be used to satisfy this requirement.

Critical Tracking

Critical Tracking records each student's progress in courses that are required for progress toward each major. Please note the critical-tracking requirements below on a per-semester basis.

Equivalent critical-tracking courses as determined by the State of Florida Common Course Prerequisites (<https://cpm.flvc.org/advance-search/>) may be used for transfer students.

Semester 1

- Complete 2 of 5 critical-tracking courses, excluding labs:
 - BSC 2010/BSC 2010L
 - BSC 2011/BSC 2011L
 - CHM 2045/CHM 2045L
 - CHM 2046/CHM 2046L
 - (MAC 1140 and MAC 1114) or MAC 1147 or MAC 2311
- 2.5 GPA required for all critical-tracking courses
- 2.0 UF GPA required

Semester 2

- Complete 1 additional critical-tracking course, excluding labs
- 2.5 GPA required for all critical-tracking courses
- 2.0 UF GPA required

Semester 3

- Complete 1 additional critical-tracking course, excluding labs
- 2.5 GPA required for all critical-tracking courses
- 2.0 UF GPA required

Semester 4

- Complete 1 additional critical-tracking course, excluding labs
- 2.5 GPA required for all critical-tracking courses
- 2.0 UF GPA required

Semester 5

- Complete all critical-tracking courses, including labs
- 2.5 GPA required for all critical-tracking courses
- 2.0 upper-division GPA required
- 2.0 UF GPA required

Semester 6

- Complete the Evolution requirement or the Genetics requirement by taking PCB 4674, ENY 4455C, AGR 3303, or PCB 3063
- 2.0 upper-division GPA required
- 2.0 UF GPA required

Semester 7

- Complete at least 1 of the following upper-level entomology requirements: ENY 4161 or ENY 4660
- 2.0 upper-division GPA required
- 2.0 UF GPA required

Semester 8

- Complete a minimum of 3 credits of ENY 4911
- 2.0 upper-division GPA required
- 2.0 UF GPA required

Model Semester Plan

To remain on track, students must complete the appropriate critical-tracking courses, which appear in bold. These courses must be completed by the terms as listed above in the Critical Tracking criteria.

This semester plan represents an example progression through the major. Actual courses and course order may be different depending on the student's academic record and scheduling availability of courses. Prerequisites still apply.

¹ This requirement can also be fulfilled by taking MAC 1140 and MAC 1114.

² 3000/4000-level courses in Entomology and Nematology or other biological sciences, subject to approval by an academic advisor in the Entomology and Nematology program.

³ To be conducted under the supervision of research faculty in the Entomology and Nematology department. See an advisor for more information.

Academic Learning Compact

The Entomology and Nematology curriculum develops an excellent knowledge base and an understanding of concepts and fundamental practices. Through formal courses, laboratory experimentation, and individual research experience, students will learn how the scientific method is applied to the biological world at the whole organism and population levels. Students will learn to evaluate hypotheses, to acquire and interpret experimental data, and to communicate results effectively in appropriate styles. Special focus will be information on insect identification, morphology, behavior, physiology, and ecology.

Before Graduating Students Must

- Pass the Entomology and Nematology competency exam, which will be tailored to individual specializations.
- Complete requirements for the baccalaureate degree, as determined by faculty.

Students in the Major Will Learn to

Student Learning Outcomes | SLOs

Content

1. Identify insects and describe and explain insect morphology, physiology, and behavior.

Critical Thinking

2. Acquire, analyze and synthesize entomological information.

Communication

3. Communicate proficiently in the sciences in oral and written forms.
