

ENVIRONMENTAL HORTICULTURE MINOR

The environmental horticulture minor helps students who seek employment opportunities associated with plant science, landscape, and nursery horticulture. The minor enables students to focus on a specialization area or to sample courses from other areas of environmental horticulture. Degree-seeking students at off-campus locations can also complete this minor.

About this Program

- **College:** Agricultural and Life Sciences
- **Credits:** 15
- **Related Plant Science Programs**

Specific courses for the minor must be approved in writing by the academic advisor and the undergraduate coordinator at least one semester before graduation.
