**HORTICULTURAL SCIENCE | HORTICULTURAL PRODUCTION**

This major prepares students for careers in plant science, including management, production, applied research, molecular biology research, marketing, sales and a number of other areas. Students can receive training ranging from commodity production/cropping systems to basic plant science/molecular biology.

**About this Program**
- **College:** Agricultural and Life Sciences
- **Degree:** Bachelor in Science
- **Credits for Degree:** 120
- **Specializations:** Horticultural Production | Horticultural Science | Organic Crop Production | Plant Molecular and Cellular Biology
- **Additional Information**
- **Related Horticultural Science Programs**

To graduate with this major, students must complete all university, college, and major requirements.

Note that critical tracking is the same for all specializations of this major except Plant Molecular and Cellular Biology.

Equivalent critical-tracking courses as determined by the State of Florida Common Course Prerequisites may be used for transfer students.

**Semester 5**
- Complete all critical-tracking courses, including labs
- 2.0 GPA required for all critical-tracking courses
- 2.0 UF GPA required

To remain on track, students must complete the appropriate critical-tracking courses, which appear in bold. These courses must be completed by the terms as listed above in the Critical Tracking criteria.

This semester plan represents an example progression through the major. Actual courses and course order may be different depending on the student's academic record and scheduling availability of courses. Prerequisites still apply.

**Semester Two**
- Select one: 3-4
  - AEB 2014 | Economic Issues, Food and You (Gen Ed Social and Behavioral Sciences) |
  - ECO 2013 | Principles of Macroeconomics (Gen Ed Social and Behavioral Sciences) |
  - ECO 2023 | Principles of Microeconomics (Gen Ed Social and Behavioral Sciences) |
  - CHM 2045 | General Chemistry 1 (Critical Tracking; State Core Gen Ed Biological Sciences and Physical Sciences) |
  - General Chemistry 1 Laboratory |
  - State Core Gen Ed Humanities | 3 |
  - Electives | 5 |

**Semester Three**
- Select one: 3-4
  - AEC 3033C | Research and Business Writing in Agricultural and Life Sciences (Writing Requirement) |
  - BOT 2010C | Introductory Botany (Critical Tracking; Gen Ed Biological Sciences and Physical Sciences) |
  - BSC 2010 & 2010L | Integrated Principles of Biology 1 and Integrated Principles of Biology Laboratory 1 (Critical Tracking; Gen Ed Biological Sciences and Physical Sciences) |
  - Gen Ed Composition; Writing Requirement | 3 |
  - Gen Ed Mathematics | 2 |
  - Electives | 4 |

**Semester Four**
- AEC 3030C | Effective Oral Communication |
- Select one: 4
  - BOT 2011C | Plant Diversity (Critical Tracking; Gen Ed Biological Sciences) |
The horticultural science major prepares students for a career in plant science, including management, production, research, marketing and sales. Students will gain knowledge ranging from commodity production and cropping systems to basic plant science and molecular biology. They will develop skills to describe how plant physiology and genetics relate to plant growth and development as well as developing knowledge of plant diseases and other factors that affect horticultural crops.

Before Graduating Students Must

• Pass the horticultural sciences competency test, given in three parts. One part will be given in each of these required courses:

  1. Pass the horticultural sciences competency test, given in three parts.
  2. Achieve minimum grades of C in AEC 3030C and AEC 3033C. These courses are graded using rubrics developed by a faculty team.
  3. Complete requirements for the baccalaureate degree, as determined by faculty.

Students in the Major Will Learn to

Student Learning Outcomes (SLOs)

Content

1. Describe fundamental concepts, skills and processes in horticultural science.
2. Apply fundamental concepts, skills and processes in horticultural science.

Critical Thinking

3. Critically analyze and interpret data in horticultural science.
4. Solve problems in horticultural science.

Communication

5. Communicate effectively in written form in a manner appropriate in the field of horticultural science.
6. Communicate effectively orally in a manner appropriate in the field of horticultural science.
