NUTRITIONAL SCIENCES

The major in nutritional sciences encompasses all aspects of the consumption and utilization of food and its constituents and how these affect health and disease of individuals and populations.

About this Program
• College: Agricultural and Life Sciences
• Degree: Bachelor of Science
• Credits for Degree: 120
• Additional Information
• Related Food Science and Human Nutrition Programs

To graduate with this major, students must complete all university, college, and major requirements.

The nutritional sciences curriculum develops a strong, broad background in the biological sciences, and provides an excellent foundation for graduate study/research in nutrition, health and many other life sciences. Its requirements also closely match the prerequisites for most professional schools. As a result, graduates from this curriculum have entered medical, dental, pharmacy, osteopathic, podiatry, optometry, chiropractic, physician assistant, veterinary and other professional programs. Other career opportunities include pharmaceutical sales, extension nutrition education, nutrition policy development and employment with government agencies. Nutritional sciences is one of the majors available to students accepted into the Junior Honors Medical Program or the Honors Combined BS/DMD Program.

Critical Tracking
Critical Tracking records each student’s progress in courses that are required for entry to each major. Please note the critical-tracking requirements below on a per-semester basis.

Equivalent critical-tracking courses as determined by the State of Florida Common Course Prerequisites may be used for transfer students.

Semester 1
• Complete CHM 2045/CHM 2045L or MAC 2311
• 2.5 GPA required for all critical-tracking courses
• 2.0 UF GPA required

Semester 2
• Complete CHM 2045/CHM 2045L and MAC 2311
• 2.5 GPA required for all critical-tracking courses
• 2.0 UF GPA required

Semester 3
• Complete CHM 2046/CHM 2046L and BSC 2010/BSC 2010L
• 2.5 GPA required for all critical-tracking courses
• 2.0 UF GPA required

Semester 4
• Complete BSC 2011/BSC 2011L
• 2.5 GPA required for all critical-tracking courses
• 2.0 UF GPA required

Model Semester Plan
To remain on track, students must complete the appropriate critical-tracking courses, which appear in bold. These courses must be completed by the terms as listed above in the Critical Tracking criteria.

This semester plan represents an example progression through the major. Actual courses and course order may be different depending on the student’s academic record and scheduling availability of courses. Prerequisites still apply.

CHM 2211 & 2211L Organic Chemistry 2 and Organic Chemistry Laboratory 5

HUN 2201 Fundamentals of Human Nutrition 3

Elective 3

Credits 16

Semester Five

AEC 3030C Effective Oral Communication 3

BCH 3025 or BCH 4024 Fundamentals of Biochemistry or Introduction to Biochemistry and Molecular Biology 4

FOS 3042 Introductory Food Science 3

PHY 2053 & 2053L Physics 1 and Laboratory for Physics 1 5

Credits 15

Semester Six

HUN 3403 Nutrition through the Life Cycle 2

Select one: 3-4

PCB 3063 Genetics
AGR 3303 Genetics
MCB 4304 Genetics of Microorganisms
PCB 4522 Molecular Genetics

PHY 2054 & 2054L Physics 2 and Laboratory for Physics 2 5

Electives 5

Credits 15-16

Semester Seven

HUN 4445 Nutrition and Disease: Part 1 2

PCB 4723C or APK 2105C Physiology and Molecular Biology of Animals or Applied Human Physiology with Laboratory 4-5

Approved science course 3-4

Approved science laboratory 1-2

Select 4 elective credits 4

Credits 14-17

Semester Eight

AEC 3033C Research and Business Writing in Agricultural and Life Sciences (Writing Requirement) 3

HUN 4221 Nutrition and Metabolism 3

HUN 4446 Nutrition and Disease: Part 2 3

MCB 3020 & 3020L Basic Biology of Microorganisms and Laboratory for Basic Biology of Microorganisms 4

Elective 3

Credits 16

Total Credits 120

Additional electives may be needed to complete the 120 credits required for graduation.

Academic Learning Compact

Nutritional sciences integrates knowledge of biological principles to interpret emerging knowledge of cellular and physiological systems. Students’ knowledge of biochemical processes and nutrient functions will enable them to interpret effects of changes in nutrient availability on metabolic functions. Students will utilize their knowledge of nutrient requirements, food sources and physiological systems to determine nutrient and dietary needs of individuals in various life-cycle stages and/or with nutrition-related diseases.

Before Graduating Students Must

• Satisfactorily complete three examinations in HUN 4221. Examinations will be developed, approved and evaluated by a faculty committee.

• Achieve minimum grades of C in AEC 3030C and AEC 3033C. These courses are graded using rubrics developed by a faculty team.

• Complete requirements for the baccalaureate degree, as determined by faculty.

Students in the Major Will Learn to

Student Learning Outcomes (SLOs)

Content

1. Use knowledge of nutrient functions, food sources and physiological systems to determine nutrient and dietary needs of individuals in various life-cycle stages and/or with nutrition-related diseases.

2. Use knowledge of biochemical processes and nutrient functions to interpret effects of changes in nutrient availability.

3. Integrate knowledge of biological principles to interpret emerging knowledge of cellular and physiological systems.

Critical Thinking

4. Analyze data and interpret results in the nutritional sciences.

Communication

5. Create, interpret and analyze written text, oral messages and multimedia presentations used in agricultural and life sciences.
