SOIL AND WATER SCIENCES | WATER SCIENCE

Students majoring in soil and water sciences complete core requirements that stress a balance between an application of fundamental science principles in relation to environmental and agricultural systems and a foundation in the humanities, social sciences, business and natural science. A capstone experience through which a student will gain employment skills needed to solve environmental and agricultural problems is required.

About this Program

- **College:** Agricultural and Life Sciences
- **School:** Natural Resources and Environment
- **Degree:** Bachelor of Science
- **Credits for Degree:** 120
- **Specializations:** Soil Science | Water Science
- **Additional Information:** Soil Science | Water Science
- **Related Soil and Water Sciences Programs**

To graduate with this major, students must complete all university, college, and major requirements.

Students are trained in managing land and water resources in a wide range of ecosystems, including agricultural, forested, range, urban and wetlands through different degree programs. Specializations within this degree program are designed to give the student a strong background in soil and water sciences with a core of required courses taken during their junior and senior years. Beyond the core courses, students can select from several groups of electives that provide flexibility in their program.

Students may also prepare for professional schools by selecting appropriate elective courses.

Water Science

Water’s abundance, quality, distribution and properties are essential to all people. Understanding water’s role in the environment and in our lives is integral to the future of this important resource. Water science is an interdisciplinary specialization that provides students with opportunities to develop skills essential for a diversity of careers in both government and private sectors. Students will work closely with advisors to develop a course of study tailored to their professional goals.

Critical Tracking

Critical Tracking records each student’s progress in courses that are required for entry to each major. Please note the critical-tracking requirements below on a per-semester basis.

Equivalent critical-tracking courses as determined by the State of Florida Common Course Prerequisites may be used for transfer students.

### Semester 1

- 2.0 GPA required for all critical-tracking courses
- 2.0 UF GPA required

### Semester 2

- Complete 1 additional critical-tracking course, excluding labs
- 2.0 GPA required for all critical-tracking courses
- 2.0 UF GPA required

### Semester 3

- Complete 1 additional critical-tracking course, excluding labs
- 2.0 GPA required for all critical-tracking courses
- 2.0 UF GPA required

### Semester 4

- Complete 1 additional critical-tracking course, excluding labs
- 2.0 GPA required for all critical-tracking courses
- 2.0 UF GPA required

### Semester 5

- Complete all critical-tracking courses, including labs
- 2.0 GPA required for all critical-tracking courses
- 2.0 UF GPA required

**Model Semester Plan**

To remain on track, students must complete the appropriate critical-tracking courses, which appear in bold. These courses must be completed by the terms as listed above in the Critical Tracking criteria.

*This semester plan represents an example progression through the major. Actual courses and course order may be different depending on the student’s academic record and scheduling availability of courses. Prerequisites still apply.*

State Core Gen Ed Composition; Writing Requirement 3
Elective

Semester Two
- IUF 1000: What is the Good Life (Gen Ed Humanities) 3
- MCB 2000: Microbiology 4
- & 2000L: Microbiology Laboratory
- SWS 2007: The World of Water (Gen Ed Physical Sciences) 3
- State Core Gen Ed Social and Behavioral Sciences 3
- Elective 2

Credits 14-15

Semester Three
- AEC 3033C
- Elective
- Gen Ed Composition: Writing Requirement 3
- Elective 2

Credits 15

Semester Four
- CHM 2046: General Chemistry 2 4
- & 2046L: General Chemistry 2 Laboratory (Critical Tracking: Gen Ed Physical Sciences)
- PHY 2004: Applied Physics 1 4
- & 2004L: Applied Physics 1 Laboratory (Critical Tracking: Gen Ed Physical Sciences)
- Select one:
  - STA 2023: Introduction to Statistics 1 (Gen Ed Mathematics) 3
  - MAC 2312: Analytic Geometry and Calculus 2 (Gen Ed Mathematics) 4
- State Core Gen Ed Humanities 3

Credits 14-15

Semester Five
- Select one:
  - CHM 3120 & 3120L: Introduction to Analytical Chemistry and Analytical Chemistry Laboratory
  - SWS 3022 & 3022L: Introduction to Soils in the Environment and Introduction to Soils in the Environment Laboratory (Gen Ed Biological and Physical Sciences) 4
  - SWS 4451: Soil and Water Chemistry 3
- Approved elective 3
- Elective 3

Credits 17

Semester Six
- AEC 3033C: Research and Business Writing in Agricultural and Life Sciences (Writing Requirement) 3
- SWS 4223: Environmental Biogeochemistry 3
- SWS 4244: Wetlands 3
- Approved electives 6

Credits 15

Summer After Semester Six
- SWS 4905 or SWS 4941: Individual Work or Full-time Practical Work Experience in Soil and Water Science 1-3
- Approved elective 2

Credits 3-5

Semester Seven
- FNR 4660: Natural Resource Policy and Economics 3
- or PUP 4224: or Florida Environmental Politics 3
- SWS 4602C: Soil Physics (Gen Ed Physical Sciences) 3
- Approved electives 7

Credits 13-14

Total Credits 120

Approved Electives

Electives are chosen with the student’s advisor. The student is encouraged to take electives from a range of course groupings that include biology, building construction, chemistry, earth science, environmental science, geology, hydrology, mathematics, physics, policy, production systems, programming, soils and statistics.

Academic Learning Compact

The soil and water sciences major enables students to identify and to describe the morphology of soils, to differentiate soils according to soil taxonomy and to distinguish soil forming factors. Students will use this knowledge to assess properties of soils in relation to plant growth and
environmental uses and to apply this knowledge to different soil uses in agriculture, natural resources and urban settings.

**Before Graduating Students Must**
- Pass the soil and water sciences competency exam, given in four parts. One part will be given in each of these required courses:
  - SWS 3022 Soils in the Environment
  - SWS 4451 Soil and Water Chemistry
  - SWS 4602C Soil Physics
  - SWS 4715C Environmental Pedology
- Satisfactorily complete an approved research project in SWS 4905 or SWS 4941.
- Achieve minimum grades of C in AEC 3030C and AEC 3033C. These courses are graded using rubrics developed by a faculty team.
- Complete requirements for the baccalaureate degree, as determined by faculty.

**Students in the Major Will Learn to**

**Student Learning Outcomes (SLOs)**

**Content**
1. Apply fundamental principles of chemistry and physics in relation to critical zone processes in the pedosphere and hydrosphere.
2. Classify fundamental biological processes and differentiate basic organism function in soil and hydrologic systems.
3. Utilize field observations, case study evidence and experimental data to describe soil formation, morphology and interactions of the varied components of the hydrologic cycle.

**Critical Thinking**
4. Critically evaluate the sustainability of water resources in relation to human needs and natural ecosystem function.
5. Demonstrate quantitative problem-solving abilities by applying, analyzing and synthesizing content knowledge related to soil and water chemistry and physics.

**Communication**
6. Create, interpret and analyze written text, oral messages and multimedia presentations used in agricultural and life sciences.
