WILDLIFE ECOLOGY AND CONSERVATION | PREPROFESSIONAL

Designed for those with a keen interest in wildlife ecology and conservation, this major provides training for a variety of wildlife careers, as well as a solid foundation for professional employment or advanced graduate study. The primary focus is to develop the student's knowledge of the conservation and management of wildlife and their habitats for the greatest aesthetic, ecological, economic, and recreational values.

About this Program

- **College**: Agricultural and Life Sciences
- **Degree**: Bachelor of Science
- **Credits for Degree**: 120
- **Specializations**: Preprofessional | Wildlife Ecology and Conservation
- **Additional Information**
- **Contact**
- **Related Wildlife Ecology and Conservation Programs**

To graduate with this major, students must complete all university, college, and major requirements.

The department also co-administers a major in natural resource conservation with the School of Forest Resources and Conservation. More Info

Related Wildlife Ecology and Conservation Programs

- Bachelor of Science in Forest Resources and Conservation
- Wildlife Ecology and Conservation minor

Preprofessional

This specialization satisfies the coursework requirements for admission to the Doctor of Veterinary Medicine program. Students pursuing admission to the College of Veterinary Medicine must take six credits of general education composition, nine credits of humanities and six credits of social and behavioral sciences.

Some students can also satisfy requirements for certification as an associate wildlife biologist by The Wildlife Society. Certification requirements and application material are available at www.wildlife.org.

Critical Tracking

Critical Tracking records each student's progress in courses that are required for entry to each major. Please note the critical-tracking requirements below on a per-semester basis.

Equivalent critical-tracking courses as determined by the State of Florida Common Course Prerequisites may be used for transfer students.

Semester 1

- Complete 2 of 7 critical-tracking courses, excluding labs: BSC 2010/2010L, BSC 2011/2011L, CHM 2045/2045L, CHM 2046/2046L, AEB 2014 or AEB 3103 or ECO 2023, MAC 2311, STA 2023
- 2.5 GPA on required math and science courses combined
- 2.0 UF GPA required

Semester 2

- Complete 2 additional critical-tracking courses, excluding labs
- 2.5 GPA on required math and science courses combined
- 2.0 UF GPA required

Semester 3

- Complete 1 additional critical-tracking course, excluding labs
- 2.5 GPA on required math and science courses combined
- 2.0 UF GPA required

Semester 4

- Complete 2 additional critical-tracking courses, excluding labs
- 2.5 GPA on required math and science courses combined
- 2.0 UF GPA required

Semester 5

- Complete all critical-tracking courses, including labs
- 2.5 GPA on required math and science courses combined
- 2.0 UF GPA required

Model Semester Plan

To remain on track, students must complete the appropriate critical-tracking courses, which appear in bold. These courses must be completed by the terms as listed above in the Critical Tracking criteria. This semester plan represents an example progression through the major. Actual courses and course order may be different depending on the student's academic record and scheduling availability of courses. Prerequisites still apply.

WIS 4523 Human Dimensions of Natural Resource
Conservation 3
FNR 4070C Environmental Education Program
Development 4
FOR 3202 Society and Natural Resources 4
FOR 4664 Sustainable Ecotourism Development 4

Credits 15-16

Semester Eight
Select 9-11 credits: 9-11
WIS 4554 Conservation Biology 3
or WIS 4203C or Landscape Ecology and Conservation
Elective 3

Credits 15-17

Total Credits 120

Additional electives may be needed to complete the 120 credits required for graduation. Students can choose any courses as electives.

State core courses can be selected to meet the university’s requirements for writing, international and diversity focused courses.

Academic Learning Compact

The primary focus of the wildlife ecology and conservation major is to develop students’ knowledge of the conceptual and applied aspects of scientific, social and ethical thought in wildlife ecology and conservation. Emphasis is placed on the biology, ecology, natural history and behavior of Florida wildlife species and the management of wildlife, their habitats and their population dynamics for the greatest aesthetic, ecological, economic and recreational values. Students will learn to think critically about major problems in the conservation of biological diversity and to apply biological principles to the preservation of this diversity.

Before Graduating Students Must

• Pass the wildlife ecology and conservation competency exam, given as part of WIS 4203C or WIS 4554.
• Achieve minimum grades of C in AEC 3033C and AEC 3033C. These courses are graded using rubrics developed by a faculty team.
• Complete requirements for the baccalaureate degree, as determined by faculty.

Students in the Major Will Learn to

Student Learning Outcomes (SLOs)

Content

1. Acquire knowledge of scientific, social and ethical arenas of wildlife ecology and conservation; acquire skills for critical reasoning in conservation management; acquire knowledge of Florida wildlife species and their biology, ecology, natural history and behavior; describe principles and applications of wildlife management practices, population dynamics and habitat management; and apply biological principles to solve problems in wildlife conservation and preserve biological diversity.
Critical Thinking
2. Apply ecological, mathematical and statistical concepts to interpret, understand and communicate wildlife ecology and conservation data.

Communication
3. Create, interpret and analyze written text, oral messages and multimedia presentations used in agricultural and life sciences.
