Academic Policies
Application Deadlines
Students are admitted for third-year professional coursework in the fall and spring semesters for construction management and each semester for fire and emergency services. Application procedures, receipt of transcripts and school requirements for admission should be completed by the application deadline. Late applications are not accepted.

Dean's List

Normal Academic Progress
Students must maintain normal academic progress with a minimum GPA of 2.0 for all courses attempted in the junior and senior years. Students must take courses in the sequence specified. Students may be dismissed from the program if they fail to maintain normal academic progress.

Normal Course Loads
The average course load for building construction students is 16 credits. Students who wish to take fewer than 12 credits should be aware that certain university privileges and benefits require a minimum course load. It is the student’s responsibility to verify the minimum course load necessary for these privileges and benefits.

Student Work
The Rinker School reserves the right to retain all student work for the purpose of record, exhibition or instruction.

Probation and Dismissal
Students who do not make satisfactory academic progress will be excluded from further registration.

Students who receive a failing grade in a BCN course will be dismissed if they subsequently receive a failing grade in the same course.

Students failing two or more BCN courses in any semester will be dismissed.

Student Responsibility
Before enrolling, it is the student’s responsibility to review and consider all pertinent information about the university and the school. Special attention must be paid to required documentation, degree requirements and deadlines.

Waiver of Liability
Several courses require field trips. All students must sign a waiver of liability and a hold harmless agreement as a prerequisite to admission to the School of Construction Management. In addition, student organizations are represented at conferences, seminars and projects outside of campus. A separate, similar waiver will be used for students who participate in these voluntary activities.
Admission to Construction Management

Admission to CM is selective and is given to those applicants whose potential indicates the greatest likelihood of success in the program.

All Students

• The school has limited admission. An applicant’s satisfaction of minimum requirements does not guarantee admission. The school has established a selective process for admission and only a limited number of new students are accepted each fall and spring term. No distinction is made between internal and external transfers. Students may apply only twice to upper division.

• Students must attain a minimum 2.50 GPA in construction management prerequisite coursework and have an overall 2.50 GPA for all freshman and sophomore work required for a baccalaureate degree in construction management.

• Students must submit SAT or ACT scores, which will be evaluated for admission selection. Students are ranked and admitted based on an evaluation of their construction management prerequisite coursework and their SAT or ACT scores.

• Students must submit a personal statement outlining their reasons for applying to the Rinker School. Consideration is also given to the number of preprofessional courses remaining, as well as to the applicant’s letter of intent, work experience, personal references and participation in student organizations and community events.

• Students must complete two sequential courses of foreign language in secondary school, 8-10 credits at the postsecondary level or document an equivalent level of proficiency.

Transfer Students

Students attending four-year colleges should follow a program of general education and preprofessional courses equivalent to the basic curriculum for entry to the Rinker School.

Junior college and public college students should:

• Complete the university transfer program at the junior college.

• Complete the A.A. degree.

• Complete all prerequisite general education and preprofessional courses, or acceptable substitutes.

Degree Requirements

Seniors must file a formal application for degree on ONE.UF by the deadline, which is early in the semester in which they expect to receive the degree.

To receive the Bachelor of Science in Construction Management, a student must complete all of the following satisfactorily:

• Complete 64 credits of construction management prerequisite requirements.

• Complete the approved program in construction management, consisting of 61 credits of 3000/4000-level coursework taken in the junior/senior years.

• Attain a minimum 2.0 overall GPA.

• Attain a minimum 2.0 GPA on all 3000/4000-level degree requirements.

• A minimum of 125 credits is required for graduation. The waiving of any required course does not reduce the credits required for graduation.

• Take the AIC (American Institute of Constructors) Associate Constructor Examination in the final semester of the senior year. The test score will affect the student’s grade in BCN 4787C Construction Capstone.

Degree Requirements for Fire and Emergency Services

Seniors must file a formal application for degree on ONE.UF by the deadline, which is early in the semester in which they expect to receive the degree.

To receive the Bachelor of Science in Fire and Emergency Services, a student must complete all of the following satisfactorily:

• Complete the approved program in fire and emergency services, consisting of 60 credits of 3000/4000-level coursework taken in the junior/senior years.

• Attain a minimum 2.0 overall GPA.

• Complete 24 credits of fire and emergency services coursework and have an overall 2.50 GPA for all freshman and sophomore work required for a baccalaureate degree in fire and emergency services.
• Complete a minimum of 120 credits. The waiving of any required course does not reduce the credits required for graduation.
