

SUSTAINABILITY AND THE BUILT ENVIRONMENT MINOR

The sustainability and the built environment minor introduces the challenges of planning, design, and construction of human structures and settlements. Courses provide an overview of environmental and cultural issues as they apply to design, planning sustainable applications and solutions.

About this Program

- **College:** Design, Construction and Planning
- **Credits:** 15, completed with minimum grades of C
- **Related Sustainability and the Built Environment Programs**

This minor is open to all students.

Field trips to broaden and expand students' educational experiences through study of planning, design, construction and sustainability projects *are required and are paid for by the student.*
