ELECTRICAL ENGINEERING

Electrical Engineering is concerned with all phases and development of the transmission and utilization of electric energy and intelligence. From communication systems to electronic components that run computers and motor vehicles, electrical engineers design products and systems that meet the needs of today and tomorrow's electrical and electronic systems.

About this Program
- **College**: Herbert Wertheim College of Engineering (http://catalog.ufl.edu/UGRD/colleges-schools/UGENG/)
- **Degree**: Bachelor of Science in Electrical Engineering
- **Credits for Degree**: 128

To graduate with this major, students must complete all university, college, and major requirements.

Department Information
Electrical engineers study electricity and design electrical systems that solve problems—how to make your smartphones smarter; how to make your refrigerator run more efficiently; coming up with the optimal visual technology that brings movies to life. While it is essential that electrical engineers understand the fundamentals of their chosen fields, they must also understand the role that other branches of engineering play in completed work. The curriculum provides a foundation in basic engineering as well as depth and breadth in electrical engineering and sufficient electives to allow specialization in academic areas including:

- Electronic Devices and Circuits
- Electromagnetics, Power and Photonics
- Computers, Communications and Systems and Controls

The curriculum also prepares an engineer for professional licensure. The department's extensive laboratory facilities and varied research programs assist in both experimental and theoretical approaches to electrical and computer engineering.

Admission Requirements
It is the department's policy to admit the best-qualified students as demonstrated by academic achievement.

To be admitted, a student must have an overall 2.5 grade point average in critical-tracking courses, based on the first two attempts in eight professional courses and have earned a minimum grade of C in each course of Calculus 1, Calculus 2, Calculus 3, Physics with Calculus 1, Physics with Calculus 2, Differential Equations and General Chemistry. Only the first two attempts (including withdrawals and drops) in each course will be considered for admission to or retention in the department.

Department Requirements
A minimum grade of C is required in any course transferred into the junior-senior years from another institution.

Courses marked below with a footnote must be completed with a minimum grade of C. For a course to be used as a prerequisite for an EEE/EEL-prefixed course, a minimum grade of C is required in the prerequisite course. Any 3000/4000 level EEL/EEE-prefixed course not taken to satisfy the breadth or depth requirement can be applied as EE technical elective, excluding EEL 3834 only counts for computer programming requirement and EEL 3003, which does not apply toward degree requirements.

ECE majors must have an overall 2.0 GPA in all ECE courses to meet degree requirements.

A student must complete both EEL 3111C and EEL 3701C before taking any 4000-level EEE or EEL course. Electrical Engineering majors must have EEL 3923C completed or in progress to apply for the IPPD program.

Any course taken to satisfy a degree requirement (general education, required course or technical elective), with the exception of EGN 4912, EEL 4948, and EEL 4949, cannot be taken S-U.

An electrical engineering student whose cumulative, upper-division or department grade point average falls below 2.0 or whose pre-professional grades do not meet department admission requirements will be placed on academic probation and be required to prepare a probation contract with an ECE academic advisor. If a student is not making normal academic progress, they will be placed on academic probation.

Students normally are given two terms in which to remove their deficit points. Students who do not satisfy the conditions of the first term of probation may be dismissed from the department.

All graduating seniors must complete an exit interview with their advisor before graduating.

Educational Objectives
The objectives of the Electrical Engineering program at the University of Florida are to prepare students to be good citizens engaged in ethical engineering for the betterment of society and enabling them, so that within a few years of graduation, they:

1. Have successful careers providing leadership in a dynamic industry that is global, multi-disciplinary, and evolving;
2. Are excelling in the top advanced studies programs in the world.
Goals
The baccalaureate program prepares students to embark upon professional careers in electrical and computer engineering or to begin graduate study. The department’s educational objectives are consistent with the ABET general criteria for accrediting programs in engineering in the United States.

Mission
The department offers undergraduate and graduate programs in electrical and computer engineering and conducts research to serve the needs of Florida and the nation.

Critical Tracking
Critical Tracking records each student's progress in courses that are required for progress toward each major. Please note the critical-tracking requirements below on a per-semester basis.

Equivalent critical-tracking courses as determined by the State of Florida Common Course Prerequisites (http://www.flvc.org/cpp/displayRecord.jsp?cip=141001&track=01) may be used for transfer students.

Semester 1
- Complete 1 of 7 tracking courses. MAC 2311, MAC 2312, MAC 2313, MAP 2302, PHY 2048, PHY 2049, and CHM 2045 or CHM 2095 must be completed with minimum grade of C in each course within two attempts (including withdrawals).
- 2.5 GPA required for all critical-tracking courses
- 2.0 UF GPA required

Semester 2
- Complete 1 additional critical-tracking course with the appropriate minimum grade within two attempts
- 2.5 GPA required for all critical-tracking courses
- 2.0 UF GPA required

Semester 3
- Complete 2 additional critical-tracking courses with the appropriate minimum grades within two attempts
- 2.5 GPA required for all critical-tracking courses
- 2.0 UF GPA required

Semester 4
- Complete 2 additional critical-tracking courses with the appropriate minimum grades within two attempts
- 2.5 GPA required for all critical-tracking courses
- 2.0 UF GPA required

Semester 5
- Complete remaining 7 critical-tracking courses with the appropriate minimum grades within two attempts
- 2.5 GPA required for all critical-tracking courses
- 2.0 UF GPA required

Semester 6
- Complete the 2 remaining Electrical Engineering Breadth required courses.
- Complete 1 EE Technical Elective courses
- 2.0 UF GPA required

Semester 7
- Complete EEL 3923C
- Complete first EE Depth course
- Complete 2 EE Technical Electives (7 credits)
- 2.0 UF GPA required

Semester 8
- Complete EEL 4924C
- Complete last EE Depth course
- Complete remaining Electrical Engineering Technical Electives (7 credits)
- 2.0 UF GPA required

Model Semester Plan
To remain on track, students must complete the appropriate critical-tracking courses, which appear in bold. These courses must be completed by the terms as listed above in the Critical Tracking criteria.

This semester plan represents an example progression through the major. Actual courses and course order may be different depending on the student's academic record and scheduling availability of courses. Prerequisites still apply.

| Semester Three | |
| MAC 2313 | Analytic Geometry and Calculus 3 (Critical Tracking; Gen Ed Mathematics) | 4 |
Interdisciplinary elective #3
Electrical Engineering Technical electives (EEL 4924C)
Semester Eight
Interdisciplinary elective #2
Electrical Engineering Technical electives (EEL 3923C)
Semester Five
Electrical Engineering Breadth elective #1 (EEL 3111C)
Semester Six
Electrical Engineering Breadth 1
Summer After Semester Four
EEL 3008 Physics of Electrical Engineering
ENC 3246 Professional Communication for Engineers
STA 3032 Engineering Statistics

Electrical Engineering Breadth 1
Semester Four
EEL 3111C Circuits 1
EEL 3135 Introduction to Signals and Systems
MAS 3114 Computational Linear Algebra
MAP 2302 Elementary Differential Equations (Critical Tracking)

Credits 14

Electrical Engineering Breadth | Select Three
Code Title Credits
EEL 3211C Basic Electric Energy Engineering 4
EEL 3939C Solid-State Electronic Devices 4
EEL 3472C Fundamentals of Electromagnetic Fields 4
EEL 3744C Microprocessor Applications 4
EEL 4260C Bioelectrical Systems 4
EEL 4514C Communication Systems and Components 4
EEL 4657C Linear Control Systems 4
EEL 4712C Digital Design 4

Electrical Engineering Breadth | Select Three

Interdisciplinary Technical Electives | Select 3 Courses
Students are able to select courses that are 3000-4000 level from the Biology/Biochemistry courses (prefixes of BSC, BCH, CHM, PCB, and ZOO); Mathematics courses (prefixes of MAA, MAD, MAP, and MAS); Physics courses (prefixes of PHY and PHZ). Students are able to count

CHM 2046 Physics with Calculus 2 (Critical Tracking, Gen Ed Physical Sciences)
PHY 2049 Physics with Calculus 2 (Gen Ed Physical Sciences)
EEL 3000 Introduction to Electrical and Computer Engineering
EEL 3701C Digital Logic and Computer Systems
EEL 3111C Circuits 1
EEL 3135 Introduction to Signals and Systems
MAS 3114 Computational Linear Algebra
MAP 2302 Elementary Differential Equations (Critical Tracking)
EEL 3003 Engineering Statistics

Semester Four
EEL 3111C Circuits 1
EEL 3135 Introduction to Signals and Systems
MAS 3114 Computational Linear Algebra
MAP 2302 Elementary Differential Equations (Critical Tracking)

Credits 14

Semester Five
EEL 3308C Electronic Circuits 1
EEL 3112 Circuits 2
State Core Social and Behavioral Sciences with Diversity
Electrical Engineering Breadth 1

Credits 14

Semester Six
Electrical Engineering Breadth electives #2 and #3 (Critical Tracking)
Interdisciplinary elective #1
Electrical Engineering Technical course (Critical Tracking)
State Core Humanities with International

Credits 17

Semester Seven
EEL 3923C Electrical Engineering Design 1 (Critical Tracking)
Electrical Engineering Depth elective #1 (Critical Tracking)
Electrical Engineering Technical electives (Critical Tracking)
Interdisciplinary elective #2

Credits 16

Semester Eight
EEL 4924C Electrical Engineering Design 2 (Critical Tracking)
Electrical Engineering Depth elective #2 (Critical Tracking)
Electrical Engineering Technical electives (Critical Tracking)
Interdisciplinary elective #3

Credits 16

Total Credits 128

1 Completed with a minimum grade of C. In order to use a course as a prerequisite course for course used as a prerequisite for an EEE/EEL-prefixed course, a minimum grade of C is required in the prerequisite course. Any 3000/4000-level EEL/EEE-prefixed course not taken to satisfy the breadth or depth requirement can be applied as an EE technical elective, excluding EEL 3834 only counts for computer programming requirement and EEL 3003, which does not apply toward degree requirements.
Before Graduating Students Must

- Pass an assessment of performance on a major design experience. Assessment will be provided by two or more faculty and/or industry practitioners.
- Pass assessment in two courses of individual assignments targeted to each learning outcome. Assessment will be provided by the instructor of the course according to department standards.
- Complete an exit interview in your final semester.
- Complete requirements for the baccalaureate degree, as determined by faculty.

Students in the Major Will Learn to

Student Learning Outcomes (SLOs)

Content
1. Identify, describe, and interpret mathematics, science and engineering principles to electrical engineering problems.

Critical Thinking
2. Design and conduct electrical engineering experiments as well as analyze and interpret data.
3. Design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.

Communication
4. Convey technical data and design information effectively for a range of audiences using a variety of methods and media.
