MATERIALS SCIENCE AND ENGINEERING MINOR

This minor is for engineering and science students with interests in materials science and engineering. Materials concerns are critical to engineering design and analysis and new materials are needed for microelectronic packages, biomedical applications, superconducting films, tool bits, cutting tools, construction, fuel-efficient engines and other industrial and scientific applications.

About this Program

- **College**: Herbert Wertheim College of Engineering
- **Credits**: 15, completed with minimum grades of C
- **Contact**: 108 Rhines Hall
- **Related Materials Science and Engineering Programs**
