In the Journalism major, students become proficient in multiple areas of journalism, reporting, and storytellng. Students learn core skills in interviewing, writing, multimedia/visuals, broadcast, and public records, as well as legal and ethical principles and practices. Students choose a specialization in broadcast, topical reporting, visuals, editing/producing, or data/coding, as well as take electives in these areas and more. Finally, students have multiple opportunities to gain practical and immersive experience inside and outside the College of Journalism and Communications.

- Spanish Language News Media Certificate

The courses enable students to develop their storytelling talent - in words, visuals, or data - and prepare them for careers in all kinds of media professions, including as reporters, writers, photographers, editors, designers, multimedia storytellers, broadcast journalists, and more. The flexible curriculum allows students to work in all kinds of traditional and new media platforms. Excellent writing skills are essential. Graduates of the program work with major journalism and media companies, as well as other industries, and have won prolific honors, including the Pulitzer Prize.

**Academic Learning Compact**

The Journalism curriculum provides a foundation in reporting, writing, numeracy, the use of public records, First Amendment/media law, history of media, and storytelling in a variety of platforms. Specialized coursework is offered in a variety of subjects, and the curriculum is designed to allow flexibility for faculty to develop curriculum in evolving areas (such as the case for the robust development of courses in data journalism and coding, both areas that did not exist several years ago).

Skills developed are applicable to traditional platforms of Journalism, as well as new, hybrid, or non-traditional forms of media. Learning outcomes prepare students for the challenges of culturally diverse and technologically changing marketplaces.
Specializations

Journalism

Students learn base skills required for journalism- and journalism-related careers. Students gain a foundation in reporting, writing, public records, and more, and they all develop a two-course specialization in their area of interest (such as photojournalism, coding, data journalism, specialized reporting, magazine writing, and more). Students come together after these two-course specializations to work in small teams in a common capstone that emphasizes advanced project work.

Sports and Media

While still having roots in traditional journalism, this curriculum has an emphasis on sports-related coursework across the college’s departments. Students are prepared for a variety of careers in sports media. Students are required to do an internship in this curriculum, which can serve as a capstone experience.

Before Graduating Students Must

• Complete requirements for the baccalaureate degree, as determined by faculty.

Students in the Major Will Learn to

Student Learning Outcomes | SLOs

Content

1. Apply basic numerical and statistical concepts used by journalists.
