

ANTHROPOLOGY UF ONLINE

Anthropology is the study of people in their cultural context and the examination of all aspects of patterned social behavior. The discipline is worldwide in scope and encompasses all aspects of human, biological, and social life from earliest times to the present. It is a broad, holistic field that seeks to understand human adaptation to natural and social environments.

Department Information

Anthropology lies at the intersection of the multiple approaches to the study of humankind that characterize other disciplines – biological, social, cultural, historical, linguistic, cognitive, material, technological and aesthetic – because of its unique holistic perspective. These multiple approaches are encapsulated in the four traditional subfields that have composed the discipline since its establishment in the 19th century: cultural (<http://sites.clas.ufl.edu/anthropology/department-subfields/cultural-anthropology/>), archaeological (<http://sites.clas.ufl.edu/anthropology/department-subfields/archaeology/>), biological (<http://sites.clas.ufl.edu/anthropology/department-subfields/biological-anthropology/>) and linguistic (<http://sites.clas.ufl.edu/anthropology/department-subfields/linguistic-anthropology/>) anthropology.

Anthropology includes four subfields: cultural anthropology, archaeology, biological anthropology, and linguistics. Undergraduates may concentrate their studies in one of these four subfields or pursue a focus in an interdisciplinary track with another major or minor. A Bachelor of Arts is earned in anthropology rather than in any one subfield.

A BA in anthropology provides students with a broad-based liberal arts education and prepares students to work in an increasingly complex world. Anthropology BA students learn about different groups of people, their prehistory, and their biological and cultural diversity through disciplines that combine social science, natural science, and the humanities. Many undergraduate anthropology majors go on to graduate school in the social sciences, while others use anthropology to prepare themselves for professional careers in other disciplines. In a world of increasing globalization and need for effective international relations and understanding, anthropology is a highly relevant liberal arts and sciences major for students interested in pursuing careers in business, education, government, health, and law.

Coursework for the Major

The major requires a minimum of 34 semester credits in anthropology and 3 credits of statistics. All coursework must be completed with minimum grades of C. A minimum of 18 credits of anthropology coursework must be completed at UF.

Required Coursework

Code	Title	Credits
Anthropology Core Courses		
ANT 2410	Cultural Anthropology	3
ANT 2140	Introduction to World Archaeology	3

ANT 3514C	Introduction to Biological Anthropology	4

There are no prerequisites for 2000-level courses. Students in the honors program may take honors sections of any offered anthropology class. Any student at the sophomore level and above with the appropriate prerequisites or permission of the instructor may enroll in cross-listed graduate-level courses. Students are encouraged to take courses that address theory and method in the discipline, in addition to survey courses and area studies.

Overseas Studies

Students concentrating in any subfield, particularly cultural anthropology and/or archaeology, are also encouraged to complete either an ethnographic study abroad program or an archaeological field school before their senior year.

Critical Tracking

Critical Tracking records each student's progress in courses that are required for progress toward each major. Please note the critical-tracking requirements below on a per-semester basis.

For degree requirements outside of the major, refer to CLAS Degree Requirements: Structure of a CLAS Degree.

Equivalent critical-tracking courses as determined by the State of Florida Common Course Prerequisites (<http://www.flvc.org/cpp/displayRecord.jsp?cip=450201&track=01>) may be used for transfer students.

Semester 1

- 2.0 UF GPA required

Semester 2

Model Semester Plan

Students are expected to complete the writing requirement while in the process of taking the courses below. Students are also expected to complete the general education international (GE-N) and diversity (GE-D) requirements concurrently with another general education requirement (typically, GE-C, H, or S).

To remain on track, students must complete the appropriate critical-tracking courses, which appear in bold. These courses must be completed by the terms as listed above in the Critical Tracking criteria.

This semester plan represents an example progression through the major. Actual courses and course order may be different depending on the student's academic record and scheduling availability of courses. Prerequisites still apply.

Academic Learning Compact

Students will develop critical thinking, problem solving and communication skills in the social sciences and in studies of natural history pertaining to human and non-human primates. Through study of human biological and cultural history and diversity, students will learn holistic, comparative and relative perspectives of anthropology, both scientific and humanistic. Emphasis is on critical thinking skills in the evaluation of alternative knowledge claims. Students will learn to identify western cultural biases, to integrate diverse sources of information into holistic perspectives and to apply anthropological knowledge and perspectives to solve problems of broad human relevance in contemporary contexts.

Before Graduating Students Must

- Achieve satisfactory evaluation of a term paper written for an upper-division course or senior honors thesis.
- Complete requirements for the baccalaureate degree, as determined by faculty.

Students in the Major Will Learn to

Student Learning Outcomes (SLOs)

Content

1. Identify, describe, explain and apply factual, conceptual and procedural knowledge in the four subfields of anthropology (cultural anthropology, archaeology, biological anthropology, linguistics).

Critical Thinking

2. Apply scientific and humanistic approaches to investigate human variation in its biological, social, and cultural dimensions, and identify and evaluate disparate knowledge claims culturally and historically.

Communication

3. Articulate anthropological knowledge professionally in written and verbal form.
