A geology degree provides an understanding of issues associated with the physical earth and skills which are in demand in today’s job market. The geology graduate will have a detailed understanding of climate change, sustainability of the Earth’s resources, and the close interplay between human activity and the environment.

### About this Program

- **College:** Liberal Arts and Sciences
- **Degrees:** Bachelor of Arts | B.A.: Environmental Geosciences | Bachelor of Science
- **Credits for Degree:** 120
- **Additional Information**
- **Related Geology Programs**

To graduate with this major, students must complete all university, college, and major requirements.

Techniques such as environmental assessment, geological hazard assessment, field-based techniques, and geographic information systems (GIS) are used to evaluate the impact of humans on the physical earth and hydrologic environment. The practical and flexible curriculum, small class sizes, computer-based learning, strong faculty, and coursework in several areas of general education make this major appealing to students who want skills linked to employment or preparation for entry to professional schools (e.g., law, medicine, business).

Geology majors learn about the Earth’s physical environment including climate, non-renewable geological resources, renewable geological resources, geological hazards and remediation as well as basic skills required by geologists. These skills and the geological perspective open doors to employment in government agencies and private firms that deal with water management, mining and petroleum exploration, climate change, the environment, and education.

### Coursework for the Major

The geology major has three different specializations: the Bachelor of Arts, the Bachelor of Arts in environmental geosciences (a joint program with the Department of Geography), and the Bachelor of Science.

Students who are uncertain which program best suits them should consult the Department of Geology’s undergraduate coordinator for information and guidance on curriculum planning.

**Bachelor of Arts**

This degree is the most flexible degree, and best suited for students interested in careers in education or environmental policy making. The degree also allows students flexibility to pursue advanced degrees in environmental law or environmental medicine.

**Bachelor of Arts: Environmental Geosciences**

Co-offered by the Department of Geography, this specialization is designed for students interested in land and water aspects of the environment. It can be tailored to focus on water and mineral exploration and management, geological hazards, environmental planning, resource sustainability, or earth science education.

**Bachelor of Science**

This degree is designed for students planning to take the professional geology (PG) licensure exam and/or to continue on to graduate study in geology. It emphasizes a core understanding of petrology, structural geology, field methodology and paleontology, and it requires significant introductory coursework in calculus, general chemistry, and physics.

### Relevant Minors and/or Certificates

**UFTeach Program**

More Info

There is a severe shortage of qualified secondary science teachers in Florida and nationwide. Students interested in becoming part of this high-demand profession should see the undergraduate coordinator about the UFTeach program. UFTeach students can complete the UFTeach minor in science teaching along with their B.A. or B.S in geology and have the coursework and preparation for professional teacher certification in Florida when they graduate.

### Research

Students in geology who wish to graduate with high or highest honors will be required to conduct an independent research project under the direction of a faculty member. Students are also afforded the opportunity to conduct research within the department’s laboratories regardless of their honors status.

### Related Geology Programs

- **Combined Degree**
- **Bachelor of Arts in Geology, UF Online**
- **Geology minor**
- **Geological Sciences certificate**

### Bachelor of Science

The professional degree is for students who want to pursue graduate school and careers in geosciences and/or environmental science. The major is extremely flexible and allows specialization in a number of subdisciplines (geochemistry, geophysics, geobiology, and hydrogeology).

The major requires 39-40 credits of geology coursework. Students must earn minimum grades of C for coursework to count toward the major.

Select one of the following semesters of physics and laboratory: 4-5

- PHY 2004 Applied Physics 1
- & 2004L and Laboratory for Applied Physics 1
- PHY 2048 Physics with Calculus 1
- & 2048L and Laboratory for Physics with Calculus 1
- PHY 2053 Physics 1
- & 2053L and Laboratory for Physics 1

Select remaining coursework from the following: 3-4

- CGS 2531 Problem Solving Using Computer Software
- CHM 2046 General Chemistry 2
- CHM 2046L General Chemistry 2 Laboratory
- PHY 2005 Applied Physics 2
- PHY 2005L Laboratory for Applied Physics 2
- PHY 2049 Physics with Calculus 2
- PHY 2049L Laboratory for Physics with Calculus 2
- PHY 2054 Physics 2
- PHY 2054L Laboratory for Physics 2
- MAC 2312 Analytic Geometry and Calculus 2
- MAC 2313 Analytic Geometry and Calculus 3
- STA 2023 Introduction to Statistics 1
- Other science credits at the 2000 level and above approved by the department

Total Credits: 15-17

Specific courses selected from among the alternatives listed above will depend upon the student’s primary interest.

Students interested in graduate school are urged to take a year of chemistry, calculus and physics. Students should contact a departmental advisor as early as possible.

Critical Tracking

Critical Tracking records each student's progress in courses that are required for entry to each major. Please note the critical-tracking requirements below on a per-semester basis.

For degree requirements outside of the major, refer to CLAS Degree Requirements: Structure of a CLAS Degree.

Equivalent critical-tracking courses as determined by the State of Florida Common Course Prerequisites may be used for transfer students.

Semester 1
- 2.0 UF GPA required

Semester 2
- 2.0 UF GPA required

Semester 3
- Complete one general introductory course (GLY 2010C Physical Geology, GLY 2030C Environmental and Engineering Geology, or any 1000-2000 level GLY, OCE, or ESC course).

GLY 2010C is recommended as it is a prerequisite for many upper-level courses.
- 2.0 UF GPA required

Semester 4
- Complete historical geology course (GLY 2100C or GLY 3105C) or GLY 3000-level geology course.
- Complete one related coursework requirement (CHM 2045/CHM 2045L, MAC 2311, or PHY 2004/PHY 2048/PHY 2053 and associated lab)
- 2.5 Critical Tracking GPA
- 2.0 UF GPA required

Semester 5
- Complete one 3000-level geology course (or historical geology course if not taken in semester 4)
- Complete one additional related coursework requirement (CHM 2045/CHM 2045L, MAC 2311, or PHY 2004/PHY 2048/PHY 2053 and associated lab)
- 2.5 Critical Tracking GPA
- 2.0 UF GPA required

Model Semester Plan

Students are expected to complete the writing requirement while in the process of taking the courses below. Students are also expected to complete the general education international (GE-N) and diversity (GE-D) requirements concurrently with another general education requirement (typically GE-C, H or S).

To remain on track, students must complete the appropriate critical-tracking courses, which appear in bold. These courses must be completed by the terms as listed above in the Critical Tracking criteria.

This semester plan represents an example progression through the major. Actual courses and course order may be different depending on the student’s academic record and scheduling availability of courses. Prerequisites still apply.

Semester Three
Select one:

CHM 2046 & 2046L General Chemistry 2 and General Chemistry 2 Laboratory (Gen Ed Physical Sciences)

Approved science course (Gen Ed Physical Sciences)

Semester Four
Select one:

GLY 2010C Physical Geology (Critical Tracking; Gen Ed Physical Sciences)

Introductory GLY course (Critical Tracking; Gen Ed Physical Sciences)

Select one:

PHY 2005 & 2005L Applied Physics 2 and Laboratory for Applied Physics 2 (Gen Ed Physical Sciences)

Approved science course (Gen Ed Physical Sciences)

Semester Five

GLY 3200C Principles of Mineralogy (Critical Tracking; Gen Ed Physical Sciences)
GLY 4750L Geological Field Methods
Electives (3000 level or above, not in major)
Gen Ed Humanities

Credits
16

Semester Six

GLY 4310C Igneous and Metamorphic Petrology (Gen Ed Physical Sciences)
GLY 4400C Structural Geology and Tectonics
Gen Ed Biological Sciences
Geology elective (any GLY course 3000 level or above)
Elective (3000 level or above, not in major)

Credits
16

Summer After Semester Six

GLY 4790 Geology Summer Field Camp

Credits
6

Semester Seven

GLY 4552C Sedimentary Geology
Gen Ed Composition
Geology elective (any GLY course 3000 level or above)
Elective (3000 level or above, not in major)

Credits
13

Semester Eight

GLY 3603C Paleontology (Gen Ed Physical Sciences)
GLY 4905 Individual Work (or one elective)
Electives (3000 level or above, not in major)

Credits
13

Total Credits
120

Bachelor of Arts

The Bachelor of Arts in geology provides knowledge of the basic concepts related to earth materials and processes, and how to collect and organize geological data in the field. Through laboratory and field-based exercises, students will learn how to interpret geologic maps and cross sections, and to understand the application of the scientific method to solve these problems in teams and individually.

Before Graduating Students Must

- Pass GLY 4155C Geology of Florida according to the department grading rubric.
- Complete requirements for the baccalaureate degree, as determined by faculty.

Students in the Major Will Learn to

Student Learning Outcomes (SLOs)

Content
1. Identify, describe and define the basic concepts related to earth materials and processes.
2. Collect data in the field.
3. Organize geologic, temporal and spatial data.

Critical Thinking
4. Interpret geologic maps and cross sections.
5. Interpret results using the scientific method.

Communication
6. Produce a clearly and effectively written synthesis of data collected in the field.
7. Work in teams to solve geologic problems and to present the results of such collaboration effectively.

Curriculum Map

Assessment Types

- Lab assignments
- Projects
- Exams

Bachelor of Science

The Bachelor of Science in geology provides knowledge of the basic concepts, theories, observational findings related to earth materials and processes, minerals and rocks, geologic time, stratigraphy and landforms. Through laboratory and field-based exercises, students will learn how to analyze data in the published literature, synthesize analog and digital datasets to produce geological maps, and understand the application...
of the scientific method to solve geological problems in teams and individually.

**Before Graduating Students Must**
- Pass GLY 4790 Summer Field Camp according to the department grading rubric.
- Complete requirements for the baccalaureate degree, as determined by faculty.
