

GEOLOGY UF ONLINE

A geology degree provides an understanding of issues associated with the physical earth and skills which are in demand in today's job market. The geology graduate will have a detailed understanding of climate change, sustainability of the Earth's resources, and the close interplay between human activity and the environment.

About this Program

- **College:** Liberal Arts and Sciences
- **Degree:** Bachelor of Arts
- **Credits for Degree:** 120
- **Additional Information**
- **Contact:** 1.855.99GATOR
- **Related Geology Programs**

To graduate with this major, students must complete all university, college, and major requirements.

Techniques such as environmental assessment, geological hazard assessment, field-based techniques, and geographic information systems (GIS) are used to evaluate the impact of humans on the physical earth and hydrologic environment. The practical and flexible curriculum, small class sizes, computer-based learning, strong faculty and coursework in several areas of general education make this major appealing to students who want skills linked to employment or preparation for entry to professional schools (e.g., law, medicine, business).

Geology majors learn about the Earth's physical environment including climate, non-renewable geological resources, renewable geological resources, geological hazards and remediation as well as basic skills required by geologists. These skills and the geological perspective open doors to employment in government agencies and private firms that deal with water management, mining and petroleum exploration, climate change, the environment and education.

The Bachelor of Arts in geology is best suited for students interested in careers in education or environmental policy making. The degree also allows students flexibility to pursue advanced degrees in environmental law or environmental medicine.

Research

Students in geology who wish to graduate with high or highest honors will be required to conduct an independent research project under the direction of a faculty member. Students are also afforded the opportunity to conduct research within the department's laboratories regardless of their honors status.

Coursework for the Major

The geology B.A. requires a minimum of 32 credits of coursework in the major. At least 23 credits must be GLY-prefixed courses at the 3000 level or above, excluding GLY 3105C. Students must earn a minimum grade of C for coursework to count toward the major.

Required Coursework

Code	Title	Credits
Introductory Coursework		
Select one of the following general introductory courses:		3-4
GLY 2010C	Physical Geology	
GLY 2030C	Environmental and Engineering Geology	

Any 1000-2000-level GLY, OCE or ESC course		
Select one of the following historical geology courses:		4
GLY 3105C	Evolution of Earth and Life	
GLY 2100C	Historical Geology	
Core Coursework		
GLY 3202C	Earth Materials	3-4
or GLY 3200C	Principles of Mineralogy	
Select 17 credits minimum of additional Geology courses at the 3000 level or higher ¹		17
Select 2-4 credits of a 1000-4000 level Geology course		2-4
Capstone Course		
GLY 4155C	Geology of Florida	3
Total Credits		32-36

¹ Excluding GLY 3105C.

Critical Tracking

Critical Tracking records each student's progress in courses that are required for entry to each major. Please note the critical-tracking requirements below on a per-semester basis.

For degree requirements outside of the major, refer to CLAS Degree Requirements: Structure of a CLAS Degree.

Equivalent critical-tracking courses as determined by the State of Florida Common Course Prerequisites may be used for transfer students.

Semester 1

- 2.0 UF GPA required

Semester 2

- 2.0 UF GPA required

Semester 3

- Complete one General Education Mathematics course
- Complete 1 of 3 critical-tracking courses with a 2.5 critical-tracking GPA. Choose one from a general introductory course (GLY 2010C, GLY 2030C, or any 1000-2000 level GLY, OCE or ESC course), a historical geology course (GLY 3105C or GLY 2100C), or a 3000-level geology course.

GLY 2010C or GLY 2030C is recommended as one of these is prerequisite to many upper-level courses.

- 2.0 UF GPA required

Semester 4

- Complete one additional critical-tracking course with a 2.5 critical-tracking GPA
- 2.0 UF GPA required

Semester 5

- Complete all tracking courses with a 2.5 critical-tracking GPA; one general introductory course (GLY 2010C, GLY 2030C, or any

1000-2000 level GLY, OCE or ESC course), one historical geology course (GLY 3105C or GLY 2100C), and one 3000-level geology course.

- 2.0 UF GPA required

Model Semester Plan

Students are expected to complete the writing requirement while in the process of taking the courses below. Students are also expected to complete the general education international (GE-N) and diversity (GE-D) requirements concurrently with another general education requirement (typically GE-C, H, or S). One of the two general education mathematics courses must be a pure math course.

To remain on track, students must complete the appropriate critical-tracking courses, which appear in bold. These courses must be completed by the terms as listed above in the Critical Tracking criteria.

This semester plan represents an example progression through the major. Actual courses and course order may be different depending on the student's academic record and scheduling availability of courses. Prerequisites still apply.

Course	Title	Credits
Semester One		
IUF 1000	What is the Good Life (Gen Ed Humanities)	3
State Core Gen Ed Composition; Writing Requirement		3
State Core Gen Ed Mathematics (Critical Tracking)		3-4
Foreign language		4-5
Select one elective		3
Credits		16-18
Semester Two		
Select one:		3-4
GLY 2010C	Physical Geology (Critical Tracking ; Gen Ed Physical Sciences)	
ESC 1000	Introduction to Earth Science (Critical Tracking ; Gen Ed Physical Sciences)	
GLY 1000	Exploring the Geological Sciences (Critical Tracking ; Gen Ed Physical Sciences)	
OCE 1001	Introduction to Oceanography (Critical Tracking ; Gen Ed Physical Sciences)	
State Core Gen Ed Biological Sciences		3
State Core Gen Ed Social and Behavioral Sciences		3
Foreign language		3-5
Credits		12-15
Semester Three		
Select one:		4
GLY 2100C	Historical Geology (Critical Tracking ; Gen Ed Physical Sciences)	
GLY 3105C	Evolution of Earth and Life (Critical Tracking ; Gen Ed Physical Sciences)	
Electives		6
Elective or foreign language if 4-3-3 option		3
Gen Ed Social and Behavioral Sciences		3
Credits		16
Semester Four		
GLY 3202C	Earth Materials (Critical Tracking)	3
Gen Ed Biological Sciences		3
State Core Gen Ed Humanities		3
Gen Ed Mathematics ¹		3-4
Gen Ed Social and Behavioral Sciences		3
Credits		15-16
Semester Five		
Gen Ed Composition		3

Electives (3000 level or above, not in major)		6
Geology elective (Critical Tracking ; 3000 level or above)		4
Gen Ed Humanities		3
Credits		16
Semester Six		
Geology electives (3000 level or above)		8
Electives (3000 level or above, not in major)		6
Credits		14
Semester Seven		
Geology electives (3000 level or above)		7
Electives		9
Credits		16
Semester Eight		
GLY 4155C	Geology of Florida	3
Geology elective		2
Electives (3000 level or above, not in major)		6
Electives		4
Credits		15
Total Credits		120

¹ Pure math if STA 2023 taken for state core in semester one.

Electives to reach the 120-credit total will vary depending on whether students select minimum or maximum credit course options.

Academic Learning Compact

The Bachelor of Arts in geology provides knowledge of the basic concepts related to earth materials and processes, and how to collect and organize geological data in the field. Through laboratory and field-based exercises, students will learn how to interpret geologic maps and cross sections, and to understand the application of the scientific method to solve these problems in teams and individually.

Before Graduating Students Must

- Pass GLY 4155C according to the department grading rubric.
- Complete requirements for the baccalaureate degree, as determined by faculty.

Students in the Major will Learn to Student Learning Outcomes (SLOs)

Content

1. Identify, describe and define the basic concepts related to earth materials and processes.
2. Collect data in the field.
3. Organize geologic, temporal and spatial data.

Critical Thinking

4. Interpret geologic maps and cross sections.
5. Interpret results using the scientific method.

Communication

6. Produce a clearly and effectively written synthesis of data collected in the field.
7. Work in teams to solve geologic problems and to present the results of such collaboration effectively.

Curriculum Map

I = Introduced; R = Reinforced; A = Assessed
