SCHOOL OF NATURAL RESOURCES AND ENVIRONMENT

The School of Natural Resources and Environment provides interdisciplinary environmental degree programs and develops leaders with integrated thinking about natural and social systems. The school’s undergraduate curriculum spans the range of human knowledge needed to solve complex environmental problems not amenable to narrowly based solutions.

Admission Requirements
Admission requirements for freshmen and students other than first-semester freshmen are found in the College of Agricultural and Life Sciences’ Academic Policies.

School Requirements and Regulations
Students admitted to the school have full responsibility for registering for appropriate courses and fulfilling school and university requirements. During their first term in the school, students must obtain academic advising and a plan of study worksheet from 103 Black Hall.

Students should review the relevant information in this catalog each term to track and plan the progress of their academic work. Failure to understand and follow these guidelines could cause unnecessary hardship, delay and expense.

Dean’s List

Probation
Refer to the College of Agricultural and Life Sciences’ Academic Policies.

Graduation requires satisfactory completion of 120 credits for the B.S. or B.A. degree and a cumulative 2.00 GPA in both the upper-division and the overall UF GPA.

Graduating with Honors

MAJORS
- Environmental Science

MINORS
- Environmental Science Minor

Combined Degree Opportunities
Eligible seniors in the School of Natural Resources and Environment can also participate in a combined degree that combines a B.A./B.S. in environmental science with a Master of Science in interdisciplinary ecology.
