HEALTH SCIENCE | GENERAL HEALTH SCIENCE

The health science program leading to the Bachelor of Health Science (BHS) degree includes didactic and experiential activities for students to learn the foundation skills necessary for success in the dynamic health environment.

About this Program

- **College**: Public Health and Health Professions
- **Degree**: Bachelor of Health Science
- **Credits for Degree**: 120
- **Specializations**: General Health Science | Pre-Occupational Therapy | Pre-Physical Therapy | Preprofessional
- **Additional Information**
- **Related Health Science Programs**

To graduate with this major, students must complete all university, college, and major requirements.

The program has two major goals: to teach foundational skills to students whose career goal is to work in health care, particularly for those who want to become health care providers, and to teach foundational skills to students who want to work with individuals, groups or communities who face social, economic or health challenges. In addition, interested students have the opportunity to explore a combined-degree program in public health.

The college offers four specializations in the freshman and sophomore years: health science general, preprofessional, pre-occupational therapy, and pre-physical therapy.

- The health science general specialization is designed for students who want to work in a health care field not mentioned in the other specializations below. The number of electives allowed in this specialization affords the student the opportunity to incorporate a range of prerequisites for different career paths.
- The health science preprofessional specialization is designed for students pursuing careers in fields such as medicine, physician assistant and dentistry, all of which require significant basic science prerequisites. This specialization is set up to integrate commonly required preprofessional courses with requirements for the health science major.
- The pre-occupational therapy specialization offers the core health science curriculum plus OT prerequisites necessary for the Master of Occupational Therapy program at UF.
- The pre-physical therapy specialization offers a suggested prerequisite course sequence for students interested in pursuing entry-level physical therapy education at the graduate/professional level.

The health science general, preprofessional and pre-PT specializations collapse into one track beginning in the junior year and follow the same core curriculum, focusing on the health care system, different diseases and disabilities, the role of the health care provider in prevention and treatment, research methods and understanding core public health concepts. The senior year focuses on patient provider communication, effective leadership and critical-thinking skills important to clinical problem solving and the bioethical and legal issues impacting health care.

Regardless of specialization selected, students complement core courses with electives to round out their academic skills and interests.

Upon successful completion of the health science program, students receive the Bachelor of Health Science degree. While the majority of students pursue graduate or professional training in a health field (e.g., occupational therapy, physical therapy, medicine, physician assistant, health administration, dentistry, public health), some students seek employment in hospital or related community organizations after completing the B.H.S.

Course Sequence

While all specializations are designed for students interested in health care, students should select the specialization that most closely approximates their career plans and overall academic performance. Included in specific tracks are typical prerequisites for UF graduate and professional programs.

All course specializations in the health science program require a minimum 3.0 overall and prerequisite GPA for admission at the junior level.

Each specialization incorporates general education math and writing requirements and health science prerequisites. All specializations accept AP or IB credit for one prerequisite course. All other prerequisite courses must be completed with minimum grades of C at the university level. Students should consult a college advisor if they need assistance or have questions about a specific course schedule.

Students must apply by February 1 for Summer B or Fall admission. All prerequisites must be completed by the end of Summer A. However, for admission consideration at the junior level, all students must have completed the following or equivalents before the application deadline:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BSC 2005</td>
<td>Biological Sciences</td>
<td>3</td>
</tr>
<tr>
<td>or BSC 2010</td>
<td>Integrated Principles of Biology 1</td>
<td></td>
</tr>
<tr>
<td>PSY 2012</td>
<td>General Psychology</td>
<td>3</td>

</tr>
<tr>
<td>CLP 3144</td>
<td>Abnormal Psychology</td>
<td>3</td>
</tr>
<tr>
<td>or DEP 3053</td>
<td>Developmental Psychology</td>
<td></td>
</tr>
</tbody>
</table>

Other remaining prerequisites should be in progress at the time of application or completed by the end of the Summer A term.

Related Health Science Programs

- Bachelor of Public Health
- Health Science minor

General Health Science

The general specialization is designed to accommodate students interested in diverse health care fields (e.g., health administration, nursing, clinical psychology).

To be on-track for the junior year, students must meet the critical-tracking criteria listed below, beginning with the first fall or spring term.

To be considered for admission at the junior level, students must:
- Remain on track each fall and spring term, for a total of four semesters.
- Complete the following prerequisites or equivalents by the end of the fourth semester:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>APK 2105C</td>
<td>Applied Human Physiology with Laboratory</td>
<td>4</td>

<td>Abnormal Psychology</td>
<td>3</td>
</tr>
<tr>
<td>or DEP 3053</td>
<td>Developmental Psychology</td>
<td></td>
</tr>
</tbody>
</table>

- The online application to the BHS program goes live as a link on the BHS website in November. Apply formally to the college by the February 1 deadline. Transfer students must apply separately to UF and to the college so they must submit two different applications.

Off-track UF freshmen and sophomores must speak with a college advisor before registering for the next semester and prior to applying for junior-year admission consideration.

### Critical Tracking

Critical Tracking records each student’s progress in courses that are required for entry to each major. Please note the critical-tracking requirements below on a per-semester basis.

Equivalent critical-tracking courses as determined by the State of Florida Common Course Prerequisites may be used for transfer students.

#### Semester One
- Complete ENC 1101 or ENC 1102 with a minimum grade of C
- Complete 9 credits of general education courses, including ENC 1101 or higher, with minimum grades of C
- 2.3 cumulative GPA on work from all institutions

#### Semester Two
- Complete STA 2023 with a minimum grade of C
- Complete PSY 2012 with a minimum grade of C
- Complete 9 additional credits of general education courses for a total of 18, including the university writing requirement
- 2.7 cumulative GPA on work from all institutions

#### Semester Three
- Complete BSC 2005 or BSC 2010 with minimum grade of C
- Complete CLP 3144 or DEP 3053 with a minimum grade of C
- Complete STA 2023 with minimum grades of C
- Complete 9 additional credits of general education courses for a total of 27
- 3.0 GPA required for all critical-tracking courses, based on all attempts
- 3.0 cumulative GPA on work from all institutions

#### Semester Four
- Complete all general education courses, including IUF 1000 and all state core courses
- Complete the university writing requirement, which must include ENC 3453 or a substitution approved by a PHHP advisor
- Complete APK 2105C with a minimum grade of C
- Complete 60 cumulative credits
- 3.0 GPA required for all critical-tracking courses and minimum grades of C on all critical-tracking courses, based on all attempts
- 3.0 cumulative GPA on work from all institutions

### Model Semester Plan

To remain on track, students must complete the appropriate critical-tracking courses, which appear in bold. These courses must be completed by the terms as listed above in the Critical Tracking criteria.

This semester plan represents an example progression through the major. Actual courses and course order may be different depending on the student’s academic record and scheduling availability of courses. Prerequisites still apply.

HSC 4608L Critical Thinking in Health Care 1 4
HSC 4652L Ethical and Legal Issues in the Health Professions 1 3
Electives (3000/4000 level) 7

Credits 15
Total Credits 120

1 Minimum grade of C required.

For semesters 5-8, students must enroll in all semesters and take all core courses in the term/order indicated, with the exception of Introduction to Statistics 2, which must be completed by the end of spring term of the junior year.

Academic Learning Compact

The Bachelor of Health Science prepares students for a career in health care systems or organizations that provide health or general human services to individuals/communities with health concerns. Students will learn the foundational interprofessional skills necessary to succeed in the dynamic healthcare environment and/or enter postbaccalaureate academic programs such as medicine, physical therapy and public health.

Before Graduating Students Must
• Receive a satisfactory grade (S) in the BHS capstone portfolio.
• Complete requirements for the baccalaureate degree, as determined by faculty.

Students in the Major Will Learn to

Student Learning Outcomes (SLOs)

Content
1. Describe key elements of the U.S. healthcare system.
2. Comprehensively describe major chronic illnesses and disabilities.
3. Describe the core functions of public health.
4. Apply knowledge and application of core bioethical principles to contemporary health issues.
5. Develop appropriate professional behaviors for health careers.

Critical Thinking
6. Develop and apply critical analysis skills to contemporary health issues.

Communication
7. Apply effective basic communication skills for health professionals.
