

PUBLIC HEALTH MINOR

The Public Health minor enables students to acquire public health knowledge that complements their career paths. The minor is designed for students going into careers other than public health who can benefit from public health knowledge. A few examples of these careers include dentistry, medicine, nursing, occupational therapy, physician assistant, nutritional sciences, psychology, anthropology, health education, and engineering.

Total Credits**15**

Counting Credits for Undergraduate or Graduate Degrees

Undergraduates who are interested in public health as a career path but do not want to pursue a Bachelor of Public Health should consider the Bachelor/MPH Combination Degree. This would allow courses taken in a student's junior and senior years to count toward an MPH degree. More Info (<http://mph.ufl.edu/>)
