ANIMAL SCIENCES

Course Search

Not all courses are offered every semester. Refer to the schedule of courses for each term’s specific offerings.

Courses

ALS 4932 Special Topics 1-3 Credits
Variable subjects provide content for the study of agricultural topics not offered in other courses.

ANS 2002 The Meat We Eat 3 Credits
Consumer-oriented elective covering meat as a food, its inspection for wholesomeness, meat grading, identification, processing, selection, preparation, and serving. Emphasizes preparation of economical, nutritious and palatable meals centered on meat. (B)
General Education - Biological Science

ANS 2005 The Role of Animals in Human History 3 Credits
Surveys the importance of animals through human history, from the Stone Age to the present. The domestication of dogs, cats, major farm animals and some less familiar, such as camels, reindeer, and buffalo and the role they played in different societies and cultures across human history. (H, N)
General Education - Humanities

ANS 2615C Meat Selection and Grading 2 Credits
Grading and classifying beef, pork, and lamb carcasses and cuts.

ANS 3006 Introduction to Animal Science 3 Credits
Role of beef cattle, dairy cattle, swine, sheep, poultry, and horses in serving humans. Introduces anatomy and physiology of digestion, growth, reproduction, and the application of genetics to livestock improvement.

ANS 3006L Introduction to Animal Science Laboratory 1 Credit
Laboratory experiences designed to accompany ANS 3006; must be registered for ANS 3006 concurrently or have already completed the lecture course.
Coreq: ANS 3006 for AL majors only

ANS 3008 Livestock Behavior and Welfare 3 Credits
Introduces basic principles and applications of animal behavior, including approaches to improve animal welfare through an understanding of animal behavior. Examples are drawn from a wide range of species, but the focus is on applying concepts to understand the behavior and welfare of livestock.
Prereq: sophomore or junior standing

ANS 3043 Growth and Development of Farm Animals 3 Credits
An integration of the physiological, genetic, and nutritional bases of animal growth, development, and body composition with application to livestock production.
Prereq: BSC 2010 and BSC 2010L, BSC 2011, BSC 2011L, and ANS3006C or equivalent; must be AL major

ANS 3079L Relationship of Form to Function in Horses 2 Credits
Principles of conformation and performance evaluation of horses. Studies the anatomy, physiology, and dynamics of the horse as it affects athletic potential and performance.

ANS 3216 Introduction to Equine Science 3 Credits
For those with an interest in equine sciences but with limited equine experience. Principles of equine selection, care, and utilization.

ANS 3217C Equine Health Management 2 Credits
Principles and practices for planning, implementing, and maintaining equine herd health.
Prereq: ANS 3006; must be AL-equine option major

ANS 3239L Techniques in Equine Science 2 Credits
Introduces the knowledge, horseback, and management skills required for proper daily horse care and conditioning. Designed for those seeking employment requiring basic horse care skills and for novice horse owners.
Prereq: ANS 3236; must be AL major

ANS 3246L Beef Production Practicum 2 Credits
Participate in beef cattle production systems under close supervision of faculty and staff; gain knowledge of best management practices regarding cattle handling, tractor, and equipment use, as well as cattle hauling by participating in experiential learning opportunities.
Prereq: sophomore or junior standing
Coreq: ANS 4243 or ANS 4254C

ANS 3250L Dairy Cattle Practicum 2 Credits
Practical application of the principles of biology and management of dairy cattle. Topics include milking procedures, behavior, cattle handling, records, and computer applications in dairy production; body condition, lameness and hygiene scoring; dairy farm evaluation; on-farm practica and field trips.
Coreq: ANS 3251

ANS 3251 Biology and Management of Dairy Cattle 2 Credits
Biology of dairy cattle and the interrelationship between biology and management. Topics include anatomy and physiology, nutrition, reproduction, genetics, behavior, diseases, dairy products, housing, management, economics, and the environmental impact of dairy production.

ANS 3319C Reproductive Physiology and Endocrinology in Domestic Animals 4 Credits
Principles of reproduction in avian and mammalian farm animals including factors related to the estrous cycle, pregnancy, lactation, semen-production, artificial insemination, pregnancy diagnosis, and environmental factors affecting reproduction.
Prereq: ANS 3006, BSC 2010 and BSC 2010L, or equivalent

ANS 3384C Genetics of Domestic Animals 3 Credits
Basic principles of Mendelian, population, and quantitative genetics as applied to improvement of domestic animals. Selection, inbreeding, and crossbreeding strategies for genetic improvement of livestock.
Prereq: ANS 3006, BSC 2011 and BSC 2011L, or equivalent

ANS 3404C Food Animal Nutrition and Feeding 3 Credits
Studies the basic nutrient requirements of food animals, primarily beef cattle and swine, at specific stages of growth, production, and reproduction; and how scientific methods and experimentation are applied to animal nutrition.
Prereq: ANS 3440
ANS 3405 Equine Nutrition and Feeding Management  2 Credits
The influence of growth, reproduction, and work on the nutrient requirements of horses and the application of that information to the planning of life cycle feeding programs.
Prereq: ANS 3440

ANS 3440 Principles of Animal Nutrition  4 Credits
The nutrients required by animals, their functions, interrelationships, and processes of utilization; feedstuff composition and their use in diet and ration formulation.
Prereq: CHM 2045 and CHM 2045L, or equivalent

ANS 3613L Livestock and Meat Evaluation  2 Credits
Basic principles of livestock evaluation, grading, and pricing of meat animals, carcasses and meat cuts.
Prereq: ANS 3006

ANS 3634C Meats  3 Credits
Integrated studies of the science and technology involved in the utilization of meat animals for food with focus on animal growth, carcass cutability, wholesomeness, palatability, and merchandising of red meat.

ANS 3934 Careers in the Livestock Industry  2 Credits
Careers in the livestock industry. Interactive exposure to employment opportunities in the animal sciences.

ANS 4212L Techniques in Farrier Science  1-2 Credits
How to evaluate and to trim the horse's hoof and to develop a working knowledge of corrective farrier techniques.

ANS 4218L Horse Psychology and Training  3 Credits
Horse behavior, instinct and senses as they relate to training. Principles of training the young foal; ground work, liberty training, and starting the young yearling under saddle; and principles of performance training.

ANS 4231 Practicum in Horse Management and Training Technique  1 Credit
Practicum in horse management and training technique.

ANS 4234 Horse Enterprise Management  2 Credits
Management principles essential to the planning and operation of commercial horse enterprises.
Prereq: AEB 3133, AGR 4231C, ANS 3237C, ANS 3319C, ANS 3384C, ANS 3405 and ANS 3440

ANS 4241L Intermediate Horse Training  2 Credits
Continue the training of a recently started under-saddled horse, exhibit horse to potential buyers, and produce annual sealed bid sale.
Prereq: AEB 3133, AGR 4231C, ANS 3237C, ANS 3319C, ANS 3384C, ANS 3405 and ANS 3440

ANS 4243 Beef Cow-Calf Management  5 Credits
Development and implementation of management programs for commercial cow-calf and purebred beef cattle enterprises.
Prereq: AEB 3133, AGR 4231C, ANS 3319C, ANS 3384C, ANS 3404C, ANS 3440

ANS 4245C Beef Background and Feedlot Management  2 Credits
Management, marketing, and utilization of beef cattle after weaning. Spring break field trip required.
Prereq: AEB 3133, AGR 4231C, ANS 3440, ANS 3404C, ANS 3613L and ANS 3634C

ANS 4318C Equine Reproductive Management  3 Credits
Equine reproduction to include anatomy, the estrous cycle, hormones and pharmacologic manipulation, gametogenesis, embryonic and fetal development, parturition, foal care, assisted technologies, and management strategies.
Prereq: ANS 3319C

ANS 4320C Applied Ruminant Reproductive Management  4 Credits
In-depth assessment and application of bovine reproductive management practices that affect the efficiency of reproduction including managerial, physiological, biological, and economical.
Prereq: ANS 3319C

ANS 4382 Equine Genetics  2 Credits
Examines the underlying mechanisms and inheritance of a number of traits in the horse; includes the impact of domestication on the genome, relationships between breeds, coat color, genetic disease and complex traits of performance and behavior.
Prereq: ANS 3384C

ANS 4388 Canine and Feline Genetics  3 Credits
Lectures, seminars, and lab exercises on application of genetic principles to canine and feline characteristics provide an in-depth understanding of how these traits are inherited and analyzed. Information on new genomic technologies and their impact on studying specific traits, including coat color and genetic disorders, are discussed.
Prereq: ANS 3384C, AGR 3303 or PCB 3063 or equivalent

ANS 4389L Molecular Techniques in Domestic Animal Genetics  2 Credits
Studies the principles of basic domestic animal molecular biology techniques and provides hands-on experience through laboratory exercises.
Prereq: ANS 3384C

ANS 4604C Live Animal Evaluation  2 Credits
Instruction of live animal selection and evaluation, relative to improving the efficiency of meat and animal production.

ANS 4605 Animal and Products Evaluation  1 Credit
Intensive training in animal and animal products evaluation.
Prereq: instructor permission

ANS 4623C Pork Production  3 Credits
Principles of modern pork production, including all aspects of swine production management systems (breeding systems, disease control, applied economics, housing, marketing, pork quality, and nutrition in a systems approach), relative to the US/Global pork supply.
Prereq: ANS 3440 and ANS 3319C and either ANS 3613L or ANS 4604C

ANS 4635C Meat Processing  3 Credits
Basic principles of the use of muscle as food, process technology, meat inspection, regulations, quality control procedures, and marketing aspects.
Prereq: ANS 3006 or FOS 3042

ANS 4701 Physiology of the Mammary Gland and Lactation  2 Credits
Insight into the endocrinology and physiology of the defining characteristics of mammals: the mammary gland and lactation, focusing on the anatomy and development of the mammary gland with an overview of the biochemical, cellular and molecular processes controlling lactation emphasizing on livestock species.
Prereq: BSC 2011, BSC 2011L, ANS 3319C, and 4AG

ANS 4900 Supervised Extension Experience in Animal Sciences  3 Credits
Firsthand, authentic extension experiences in animal sciences under the supervision of a faculty member. Projects may involve program planning, development, implementation, and evaluation. (S-U)

ANS 4905 Problems in Animal Science  1-3 Credits
Qualified students are assigned a problem involving care and management of livestock or the investigation of a current topic in animal science.
Prereq: instructor permission
ANS 4911 Supervised Research in Animal Sciences 3 Credits
Firsthand, authentic research in animal sciences under the supervision of a faculty member. Projects may involve inquiry, design, investigation, scholarship, discovery or application. (S-U)

ANS 4915 Honors Thesis Research in Animal Sciences 3 Credits
Independent research in animal sciences leading to an honors thesis, mentored by a faculty member. Projects may involve inquiry, design, investigation, scholarship, discovery or application. (S-U)
Prereq: junior standing, upper division GPA of 3

ANS 4931 Senior Seminar 1 Credit
Oral presentation and papers on issues facing the livestock industry.
Prereq: senior standing; must be AL major

ANS 4932 Special Topics in Animal Sciences 1-3 Credits
Special topics in Animal Sciences.
Prereq: Sophomore standing

ANS 4941 Full-Time Practical Work Experience in Animal Science 2-8 Credits
Credit is earned on the basis of one hour per month of employment. (S-U)
Prereq: prior arrangement with advisor

ATE 2511 Companion Animal Biology and Management 3 Credits
Principles and practices of proper selection, care, nutrition, genetics, reproduction, and training of companion animals, with emphasis on dogs, cats, and selected bird species.

VME 4103 Livestock Health/Disease Prevention 2 Credits
The principal diseases of livestock and practical methods for their prevention and control.
Prereq: instructor permission
