ENJOY THE ENVIRONMENTAL ENGINEERING SCIENCES

Course Search
Not all courses are offered every semester. Refer to the schedule of courses for each term’s specific offerings.

More Info

Courses at the University of Florida, with the exception of specific foreign language courses and courses in the online Master of Arts in Mass Communication program, are taught in English.

Courses

EES 3000L Environmental Science and Humanity Laboratory 1 Credit
Field and laboratory instruction on ecosystems, environmental treatment and control systems, and methods of environmental analysis. Intended for junior level environmental science majors and minors. (B)
General Education - Biological Science

EES 3008 Energy and Environment 3 Credits
Consideration of the energy basis for man and nature including principles of energy analysis, systems ecology and public policy. (P)
General Education - Physical Science

EES 4005C Ecological Engineering 1 Credit
Application of ecological and engineering principles to natural resource management and problem solving.
Prereq: CHM 2046 or CHM 2096
Coreq: EES 4203

EES 4050 Environmental Planning and Design 3 Credits

EES 4102 Wastewater Microbiology 2 Credits
General concepts in microbiology and cell biology with major emphasis on the role of microorganisms in polluted environments. (B)
Prereq: CHM 2046
General Education - Biological Science

EES 4102L Environmental Biology Laboratory 1 Credit
Focuses on the biota (microorganisms, algae, zooplankton, fish, and plants) found in natural (lakes and wetlands) and engineered systems, ecological engineering approach to management of surface waters and ecological modeling.

EES 4103 Applied Ecology 2 Credits
Application of ecological principles to technological resource management and problem solving. (B)
General Education - Biological Science

EES 4201 Water Chemistry 3 Credits
Kinetics and equilibrium of aqueous chemistry including acid-base, complexation, precipitation and redox equilibria. (P)
Prereq: CHM 2046 or CHM 2096 and MAC 2311 or MAC 2233
General Education - Physical Science

EES 4203 Phase Partitioning in the Environment 4 Credits
A study of the fate of organic pollutants in the environment through application of principles of organic chemistry and chemical thermodynamics, including phase partitioning between environmental media.
Prereq: CHM 2046 or CHM 2096

EES 4316 Industrial Ecology 3 Credits

EES 4401 Public Health Engineering 3 Credits
Application of engineering principles to protect public health. Areas covered include water supply, waste treatment, air pollution, radiological health, occupational health, milk and food sanitation, vector control, solid wastes, and housing hygiene. (P)
General Education - Physical Science

EGN 4912 Engineering Directed Independent Research 3 Credits
Provides firsthand, supervised research with a faculty advisor or postdoctoral or graduate student mentor. Projects may involve inquiry, design, investigation, scholarship, discovery or application. (S-U)

EGS 1005 Prep for Success 1-4 Credits
Freshman success course that includes academic preparation in calculus, chemistry, student success and technical communications. (S-U)
Prereq: EG student

EMA 4535 Sustainable Nanotechnology 3 Credits
Increase in production and use of engineered nanomaterials (ENMs) raises concerns on their potential impacts on the environment and human health. The sustainable development of nanotechnology requires knowledge of life cycle and environmental fate/implications of ENMs. Focusses on linkages between ENMs properties and environmental implications.
Prereq: CHM 2046 or CHM 2047 or CHM 2096

ENV 3040C Computational Methods in Environmental Engineering 3 Credits
Numerical modeling techniques and their application to environmental engineering. Use of personal computers and spreadsheets to solve numerical models. Solution techniques include numerical methods and their implementation using Excel and Visual Basic for Applications (VBA).
Prereq: MAC 2313
Coreq: MAP 2302

ENV 3930 Environmental Engineering Ethics Seminar 1 Credit
Intended for undergraduates majoring in environmental engineering. Lectures and discussion on ethics topics in environmental engineering sciences. (H)
General Education - Humanities

ENV 4041C Environmental Analysis 3 Credits
Theory and laboratory techniques for the analysis of air and water pollutants and basic concepts of ecosystems structure and analysis.
Prereq: CHM 2046 or CHM 2096 and STA 3032 or STA 2023
Design of selected water treatment processes including disinfection, air stripping, adsorption, ion exchange and membrane processes.

**Prereq:** ENV 4514C and EES 4201

### ENV 4432 Potable Water System Design

Design of conventional water treatment operations, including reactor design, coagulation, flocculation, mixing, sedimentation, filtration, softening, disinfection and sludge management.

**Prereq:** EES 4201 and ENV 4514C

### ENV 4501 Environmental Hydrology 1

Surface and atmospheric hydrology. Hydrologic processes controlling streamflow events. Practical application to stormwater management.

**Prereq:** ENV 3040C and STA 3032 or STA 2023

### ENV 4506 Environmental Hydrology 2

Subsurface hydrology. Properties of porous media governing flow and chemical transport in the subsurface. Environmental site evaluation methods.

**Prereq:** ENV 3040C and (CWR 3201 or EGN 3353C)

### ENV 4514C Water and Wastewater Treatment

Design of water and wastewater treatment units.

### ENV 4532 Wastewater System Design

Detailed design and layout of gravity wastewater collection systems, pumping facilities, force mains, and a wastewater treatment plant. Emphasis on the preparation of design drawings and estimating costs.

**Prereq:** ENV 4514C

**Coreq:** ENV 4561 or CWR 4202

### ENV 4561 Hydraulic Systems Design

Hydraulic design of water distribution systems, wastewater collection and disposal systems, and water and wastewater treatment plants.

**Prereq:** CWR 3201

### ENV 4601 Environmental Resources Management

Theory and application of engineering economics and systems analysis to the design of environmental management systems.

**Prereq:** ENV 3040C

### ENV 4905 Individual Studies in Environmental Engineering Sciences

Selected problems or projects in the student's major field of study.

### ENV 4912 Integrated Product and Process Design 1: Environmental Engineering Sciences

The first part of a two-course sequence in which multidisciplinary teams of engineering and business students partner with industry sponsors to design and build authentic products and processes—on time and within budget. Working closely with industry liaison engineers and a faculty coach, students gain practical experience in teamwork and communication, problem solving and engineering design, and develop leadership, management and people skills.

**Prereq:** ENV 4514C

**Coreq:** ENV 4121 or ENV 4351

### ENV 4913 Integrated Product and Process Design 2: Environmental Engineering Sciences

The second part of the sequence in which multidisciplinary teams of engineering and business students partner with industry sponsors to design and build authentic products and processes—on time and within budget. Working closely with industry liaison engineers and a faculty coach, students gain practical experience in teamwork and communication, problem solving and engineering design, and develop leadership, management and people skills.

**Prereq:** ENV 4912

### ENV 4932 Special Problems in Environmental Engineering Sciences

Special problems in environmental engineering science.
ENV 4949 Co-op Work Experience 1 Credit
One term industrial employment including extra work according to a pre-approved outline. Practical engineering work under industrial supervisor, as set forth in the Herbert Wertheim College of Engineering regulations. (S-U)
Prereq: EG classification
