ENVIROMENTAL ENGINEERING SCIENCES

Not all courses are offered every semester. Refer to the schedule of courses for each term’s specific offerings.

More Info (http://registrar.ufl.edu/soc)

Courses at the University of Florida, with the exception of specific foreign language courses and courses in the online Master of Arts in Mass Communication program, are taught in English.

Department Information

The broad undergraduate environmental engineering curriculum of EES has earned the department a ranking as a leading undergraduate program. The ABET-accredited engineering bachelor’s degree is comprehensively based on physical, chemical, and biological principles to solve environmental problems affecting air, land, and water resources. An advising scheme including select faculty, led by the undergraduate coordinator, guides each student through the program.

Curriculum

• Combination Degrees
• Environmental Engineering

Courses

EES 3000L Environmental Science and Humanity Laboratory 1 Credit
Grading Scheme: Letter Grade
Field and laboratory instruction on ecosystems, environmental treatment and control systems, and methods of environmental analysis. Intended for junior level environmental science majors and minors. (B)
Attributes: General Education - Biological Science

EES 3008 Energy and Environment 3 Credits
Grading Scheme: Letter Grade
Consideration of the energy basis for man and nature including principles of energy analysis, systems ecology and public policy. (P)
Attributes: General Education - Physical Science

EES 3206 Environmental Chemistry 4 Credits
Grading Scheme: Letter Grade
This course is designed to provide students with fundamental knowledge needed to solve pollution problems specific to environmental systems. The course focuses primarily on thermodynamic equilibrium and kinetic principles associated with both natural and engineered systems. Prerequisite: (CHM 2046 or CHM 2096) and MAC 2311.

EES 4005C Ecological Engineering 3 Credits
Grading Scheme: Letter Grade
Application of ecological and engineering principles to natural resource management and problem solving.
Prerequisite: CHM 2046 or CHM 2096;
Corequisite: EES 4203.

EES 4050 Environmental Planning and Design 3 Credits
Grading Scheme: Letter Grade

EES 4102 Wastewater Microbiology 2 Credits
Grading Scheme: Letter Grade
General concepts in microbiology and cell biology with major emphasis on the role of microorganisms in polluted environments. (B)
Prerequisite: CHM 2046.
Attributes: General Education - Biological Science

EES 4102L Environmental Biology Laboratory 1 Credit
Grading Scheme: Letter Grade
Focuses on the biota (microorganisms, algae, zooplankton, fish, and plants) found in natural (lakes and wetlands) and engineered systems, ecological engineering approach to management of surface waters and ecological modeling.

EES 4103 Applied Ecology 2 Credits
Grading Scheme: Letter Grade
Application of ecological principles to technological resource management and problem solving. (B)
Attributes: General Education - Biological Science

EES 4201 Water Chemistry 3 Credits
Grading Scheme: Letter Grade
Kinetics and equilibrium of aqueous chemistry including acid-base, complexation, precipitation and redox equilibria. (P)
Prerequisite: CHM 2046 or CHM 2096 and MAC 2311 or MAC 2233.
Attributes: General Education - Physical Science

EES 4203 Phase Partitioning in the Environment 4 Credits
Grading Scheme: Letter Grade
A study of the fate of organic pollutants in the environment through application of principles of organic chemistry and chemical thermodynamics, including phase partitioning between environmental media.
Prerequisite: CHM 2046 or CHM 2096.

EES 4316 Industrial Ecology 3 Credits
Grading Scheme: Letter Grade

EES 4401 Public Health Engineering 3 Credits
Grading Scheme: Letter Grade
Application of engineering principles to protect public health. Areas covered include water supply, waste treatment, air pollution, radiological health, occupational health, milk and food sanitation, vector control, solid wastes, and housing hygiene. (P)
Attributes: General Education - Physical Science

EES 4102 Wastewater Microbiology 2 Credits
Grading Scheme: Letter Grade
General concepts in microbiology and cell biology with major emphasis on the role of microorganisms in polluted environments. (B)
Prerequisite: CHM 2046.
Attributes: General Education - Biological Science

EES 4102L Environmental Biology Laboratory 1 Credit
Grading Scheme: Letter Grade
Focuses on the biota (microorganisms, algae, zooplankton, fish, and plants) found in natural (lakes and wetlands) and engineered systems, ecological engineering approach to management of surface waters and ecological modeling.

EES 4103 Applied Ecology 2 Credits
Grading Scheme: Letter Grade
Application of ecological principles to technological resource management and problem solving. (B)
Attributes: General Education - Biological Science

EES 4201 Water Chemistry 3 Credits
Grading Scheme: Letter Grade
Kinetics and equilibrium of aqueous chemistry including acid-base, complexation, precipitation and redox equilibria. (P)
Prerequisite: CHM 2046 or CHM 2096 and MAC 2311 or MAC 2233.
Attributes: General Education - Physical Science

EES 4203 Phase Partitioning in the Environment 4 Credits
Grading Scheme: Letter Grade
A study of the fate of organic pollutants in the environment through application of principles of organic chemistry and chemical thermodynamics, including phase partitioning between environmental media.
Prerequisite: CHM 2046 or CHM 2096.

EES 4316 Industrial Ecology 3 Credits
Grading Scheme: Letter Grade

EES 4401 Public Health Engineering 3 Credits
Grading Scheme: Letter Grade
Application of engineering principles to protect public health. Areas covered include water supply, waste treatment, air pollution, radiological health, occupational health, milk and food sanitation, vector control, solid wastes, and housing hygiene. (P)
Attributes: General Education - Physical Science

EES 4005C Ecological Engineering 3 Credits
Grading Scheme: Letter Grade
Application of ecological and engineering principles to natural resource management and problem solving.
Prerequisite: CHM 2046 or CHM 2096;
Corequisite: EES 4203.

EES 4050 Environmental Planning and Design 3 Credits
Grading Scheme: Letter Grade

EES 4102 Wastewater Microbiology 2 Credits
Grading Scheme: Letter Grade
General concepts in microbiology and cell biology with major emphasis on the role of microorganisms in polluted environments. (B)
Prerequisite: CHM 2046.
Attributes: General Education - Biological Science

EES 4102L Environmental Biology Laboratory 1 Credit
Grading Scheme: Letter Grade
Focuses on the biota (microorganisms, algae, zooplankton, fish, and plants) found in natural (lakes and wetlands) and engineered systems, ecological engineering approach to management of surface waters and ecological modeling.

EES 4103 Applied Ecology 2 Credits
Grading Scheme: Letter Grade
Application of ecological principles to technological resource management and problem solving. (B)
Attributes: General Education - Biological Science

EES 4201 Water Chemistry 3 Credits
Grading Scheme: Letter Grade
Kinetics and equilibrium of aqueous chemistry including acid-base, complexation, precipitation and redox equilibria. (P)
Prerequisite: CHM 2046 or CHM 2096 and MAC 2311 or MAC 2233.
Attributes: General Education - Physical Science

EES 4203 Phase Partitioning in the Environment 4 Credits
Grading Scheme: Letter Grade
A study of the fate of organic pollutants in the environment through application of principles of organic chemistry and chemical thermodynamics, including phase partitioning between environmental media.
Prerequisite: CHM 2046 or CHM 2096.

EES 4316 Industrial Ecology 3 Credits
Grading Scheme: Letter Grade

EES 4401 Public Health Engineering 3 Credits
Grading Scheme: Letter Grade
Application of engineering principles to protect public health. Areas covered include water supply, waste treatment, air pollution, radiological health, occupational health, milk and food sanitation, vector control, solid wastes, and housing hygiene. (P)
Attributes: General Education - Physical Science
EGN 4912 Engineering Directed Independent Research 0-3 Credits
Grading Scheme: S/U
Provides firsthand, supervised research with a faculty advisor or postdoctoral or graduate student mentor. Projects may involve inquiry, design, investigation, scholarship, discovery or application. (S-U)

EGS 1005 Prep for Success 1-4 Credits
Grading Scheme: S/U
Freshman success course that includes academic preparation in calculus, chemistry, student success and technical communications. (S-U)
Prerequisite: EG student.

EMA 4535 Sustainable Nanotechnology 3 Credits
Grading Scheme: Letter Grade
Increase in production and use of engineered nanomaterials (ENMs) raises concerns on their potential impacts on the environment and human health. The sustainable development of nanotechnology requires knowledge of life cycle and environmental fate/implications of ENMs. Focuses on linkages between ENMs properties and environmental implications.
Prerequisite: CHM 2046 or CHM 2047 or CHM 2096.

ENV 2003 Introduction to Environmental Engineering 1 Credit
Grading Scheme: S/U
Introduction to topics in environmental engineering, including water and air quality, sustainable materials management, and ecosystems.

ENV 3001 Core 1: Introduction to Environmental Systems 4 Credits
Grading Scheme: Letter Grade
Introduction to environmental systems, including water, air, materials, and ecological resources with motivating case studies across topics and fundamental definitions, laws, and theories in environmental engineering sciences. Throughout the course, students will build knowledge base and relevant skills in topics that bridge disciplines, including statistics, thermodynamics, microbiology, and organic chemistry.
Prerequisite: PHY 2048 and CHM 2046 and MAC 2312.

ENV 3002 Core 2: Fundamentals of Environmental Engineering 4 Credits
Grading Scheme: Letter Grade
Fundamentals of environmental engineering, including water, air, materials, and ecological resources. Environmental laws and regulations that motivate environmental engineering practice. Theoretical approaches for quantifying fundamental environmental processes, interactions, impact and risks. Students will build knowledge and relevant skills in topics that bridge disciplines, including statistics, thermodynamics, microbiology, and organic chemistry
Prerequisite: ENV 3001.

ENV 3040C Computational Methods in Environmental Engineering 3 Credits
Grading Scheme: Letter Grade
Numerical modeling techniques and their application to environmental engineering. Use of personal computers and spreadsheets to solve numerical models. Solution techniques include numerical methods and their implementation using Excel and Visual Basic for Applications (VBA).
Prerequisite: MAC 2313;
Corequisite: MAP 2302.

ENV 3930 Environmental Engineering Ethics Seminar 1 Credit
Grading Scheme: Letter Grade
Intended for undergraduates majoring in environmental engineering. Lectures and discussion on ethics topics in environmental engineering sciences. (H)
Attributes: General Education - Humanities

ENV 4009 Core 5: Environmental Engineering Practice 4 Credits
Grading Scheme: Letter Grade
Utilize fundamental and applied concepts in environmental engineering practice, including applications of ecological engineering, air pollution control, waste facilities design, and advanced water treatment processes. Throughout the course, students will build knowledge base and relevant skills in topics that bridge disciplines, including statistics, thermodynamics, microbiology, and organic chemistry.
Prerequisite: ENV 4454.

ENV 4041C Environmental Analysis 3 Credits
Grading Scheme: Letter Grade
Theory and laboratory techniques for the analysis of air and water pollutants and basic concepts of ecosystems structure and analysis.
Prerequisite: (CHM 2046 or CHM 2096) and (STA 3032 or STA 2023).

ENV 4101 Elements of Atmospheric Pollution 3 Credits
Grading Scheme: Letter Grade
Sources, effects and regulation of air pollutants. Meteorology and dispersion of pollutants. Sampling and analysis of gaseous and particulate air pollutants. Photochemical air pollution and mobile sources. (P)
Prerequisite: EES 4203 and PHY 2049.
Attributes: General Education - Physical Science

ENV 4112C Air Sampling and Analysis 3 Credits
Grading Scheme: Letter Grade
Applies physical and chemical principles to measurement of gaseous and particulate pollutants in ambient air.
Prerequisite: ENV 4101.

ENV 4121 Air Pollution Control Design 3 Credits
Grading Scheme: Letter Grade
Principles of particulate and gaseous emission control; design and operation of particulate and gas control equipment to meet federal emission standards.
Prerequisite: ENV 4101.

ENV 4122 Design of Air Pollution Control System 3 Credits
Grading Scheme: Letter Grade
Design of a complete air pollution control system including the industrial ventilation system needed to capture, transport and condition the hot, corrosive gases from an industrial process.
Prerequisite: ENV 4101 and ENV 4121.

ENV 4212 Nuclear Power Radioactive Waste Technology 3 Credits
Grading Scheme: Letter Grade
Characterization and description of low and high level radwastes, regulatory requirements and method of treatment. Transportation, burial and surveillance of radwaste. Decommissioning of nuclear facilities.
Prerequisite: refer to the department.

ENV 4300 Solid Waste Containment Design 3 Credits
Grading Scheme: Letter Grade
Design fundamentals of solid and hazardous waste landfills, waste piles, monofills and surface impoundments. Regulations, site requirements, sizing, liner design, leachate and gas management system design, operations and closure.
Prerequisite: ENV 4351;
Corequisite: ENV 4561 or CWR 4202.

**Prerequisites:**
- EES 4201
- ENV 4111
- ENV 4411
- ENV 4432
- ENV 4453
- ENV 4454
- ENV 4905
ENV 4912 Integrated Product and Process Design 1: Environmental Engineering Sciences 3 Credits
Grading Scheme: Letter Grade
The first part of a two-course sequence in which multidisciplinary teams of engineering and business students partner with industry sponsors to design and build authentic products and processes on time and within budget. Working closely with industry liaison engineers and a faculty coach, students gain practical experience in teamwork and communication, problem solving and engineering design, and develop leadership, management and people skills.
Prerequisite: ENV 4514C; Corequisite: ENV 4121 or ENV 4351.

ENV 4913 Integrated Product and Process Design 2: Environmental Engineering Sciences 3 Credits
Grading Scheme: Letter Grade
The second part of the sequence in which multidisciplinary teams of engineering and business students partner with industry sponsors to design and build authentic products and processes on time and within budget. Working closely with industry liaison engineers and a faculty coach, students gain practical experience in teamwork and communication, problem solving and engineering design, and develop leadership, management and people skills.
Prerequisite: ENV 4912.

ENV 4932 Special Problems in Environmental Engineering Sciences 1-4 Credits
Grading Scheme: Letter Grade
Special problems in environmental engineering science.

ENV 4949 Environmental Engineering Internship/Co-op 1-3 Credits
Grading Scheme: S/U
Practical internship/co-op work experience under approved industrial supervision. (S/U)
Prerequisite: Engineering major.
