

GEOGRAPHY

Not all courses are offered every semester. Refer to the schedule of courses for each term's specific offerings.

More Info (<https://one.ufl.edu/soc/>)

Unless otherwise indicated in the course description, all courses at the University of Florida are taught in English, with the exception of specific foreign language courses.

Department Information

The Geography Department offers a range of topics in contemporary geography and geospatial science, rich and lively cultural and learning environments, B.A. and B.S. undergraduate degrees, M.A., M.S., and PhD degrees, as well as the largest Medical Geography program in the United States.

Curriculum

- Combination Degrees
- Geographic Artificial Intelligence and Big Data Certificate
- Geography
- Geography Minor
- Geography Minor UF Online
- Geography UF Online
- Geospatial Information Analysis Certificate
- Medical Geography Certificate
- Medical Geography in Global Health Minor
- Meteorology and Climatology Certificate

Courses

GEA 1000 Geography for a Changing World 3 Credits

Grading Scheme: Letter Grade

The spatial organization of society. Emphasizes the political regions of the world. (S and N)

Attributes: General Education - International, General Education - Social Science

GEA 1050 Prisoners of Geography: 10 Maps That Explain Everything About the World 3 Credits

Grading Scheme: Letter Grade

Introduces the ways in which international affairs can be understood through geographical factors: not just the physical landscape (the natural barriers of mountains or connections of river networks, for example), but also climate, demographics, biogeography, environment, cultural regions, and access to natural resources. Utilizing maps, works to explain and understand complex geopolitical landscapes that shape our world in an ever more complex, chaotic, and interlinked manner.

GEA 2270 Geography of Florida 3 Credits

Grading Scheme: Letter Grade

Geographic conditions and human adjustments in the major regions in Florida. The natural environment, population, routes of communication, industries, resources and strategic location in their geographical and historical aspects. (WR)

Attributes: Satisfies 6000 Words of Writing Requirement

GEA 3405 Geography of Latin America 3 Credits

Grading Scheme: Letter Grade

Examines the interconnecting land, life and welfare throughout Latin America. (WR)

Attributes: Satisfies 6000 Words of Writing Requirement

GEA 3500 Geography of Europe 3 Credits

Grading Scheme: Letter Grade

Comprehensive and systematic survey of the population, natural resources, geographic regions and potentialities of Europe and the significance of this region in the economic and political affairs of the world. (N and S)

Attributes: General Education - International, General Education - Social Science

GEA 3600 Geography of Africa 3 Credits

Grading Scheme: Letter Grade

Comprehensive and systematic survey of the population, natural resources, geographic regions and potentialities of Africa and the significance of this region in the economic and political affairs of the world. (S and N) (WR)

Attributes: General Education - International, General Education - Social Science, Satisfies 6000 Words of Writing Requirement

GEA 4465 Amazonia 3 Credits

Grading Scheme: Letter Grade

The biophysical basis of natural resource management, cultural diversity and economic development in Amazonia. Appreciating the complexity and variability of soils, vegetation, aquatic ecosystems and climate in the region offers clues for understanding human settlement and development as well as the potential and limitations of the rich natural resource base. (S and N)

Attributes: General Education - International, General Education - Social Science

GEA 4911 Undergraduate Research in Regional Geography 0-3 Credits

Grading Scheme: Letter Grade

Provides firsthand, supervised research in Regional Geography. Projects may involve inquiry, design, investigation, scholarship, discovery or application in Regional Geography.

GEO 2002 Why Geography Matters: More Than Ever 3 Credits

Grading Scheme: Letter Grade

Introduces global transformations of all kinds: intense climate change significant weather extremes; unprecedented terrorist attacks; costly wars in Iraq Afghanistan; a terrible overlooked conflict in Equatorial Africa; an economic crisis threatening the stability of the international system. Presents these events their interconnections. Places our turbulent world in a more understandable light.

GEO 2006 Natural Hazards Geography 3 Credits

Grading Scheme: Letter Grade

Examines global weather, climate, and geophysical hazard events through geographic lens of human-environment interactions to understand how disasters emerge not only due to extreme events but from complex social, cultural, psychological, political, and economic forces. Discusses historical, recent, and ongoing hazard events to connect theory to individual and shared experiences.

Attributes: General Education - International, General Education - Social Science

GEO 2200 Dynamic Planet Earth 3 Credits

Grading Scheme: Letter Grade

Studies the development and distribution of landforms, climates, minerals, soils and water resources. Interrelationships among the physical environment and regional patterns formed by these elements are analyzed against man's utilization of them. (P)

Attributes: General Education - Physical Science

GEO 2200L Physical Geography Laboratory 1 Credit

Grading Scheme: Letter Grade

Laboratory in physical geography, for lab science credit. (P)

Corequisite: GEO 2200 or GEO 2201.

Attributes: General Education - Physical Science

GEO 2242 Extreme Weather 3 Credits

Grading Scheme: Letter Grade

Introduces the science of weather (what we get short term) and climate (what we expect long term) and current scientific developments in such areas as extreme weather prediction, global climate change and improved forecasting of events. (P)

Attributes: General Education - Physical Science

GEO 2351 Geographical Sciences and Sustainability 3 Credits

Grading Scheme: Letter Grade

Examines the most critical environmental issues facing the world today; emphasizes the sustainability of both human and physical systems in the 21st century utilizing cutting edge geographic technologies: spatial analysis, GIS and satellite imagery.

Prerequisite: any Biological Sciences or Physical Sciences general education course.

GEO 2410 Social Geography 3 Credits

Grading Scheme: Letter Grade

Introduces geography as a social science. Various social concepts presented from a spatial perspective. (S and D)

Attributes: General Education - Diversity, General Education - Social Science

GEO 2420 People, Place, and Culture 3 Credits**Grading Scheme:** Letter Grade

Introduces cultural geography with an emphasis upon the development and spatial arrangement of the major societies of the modern world. (S and N)

Attributes: General Education - International, General Education - Social Science**GEO 2426 Pop Music and Culture: a Geographic Perspective 3 Credits****Grading Scheme:** Letter Grade

Examines the geographic origins, development and diffusion of contemporary pop music and the regional dynamics of pop music culture from the 1950s to present. (S)

Attributes: General Education - Social Science**GEO 2500 Global and Regional Economies 3 Credits****Grading Scheme:** Letter Grade

Contemporary perspectives, themes and research in economic geography, focusing on issues and problems associated with regional and global economic and demographic change. Regional variations and disparities in growth and development are analyzed and policy implications discussed. (S) (WR)

Attributes: General Education - Social Science, Satisfies 6000 Words of Writing Requirement**GEO 3162C Introduction to Quantitative Analysis for Geographers 4 Credits****Grading Scheme:** Letter Grade

Introduces elementary geographical data analysis, including spatial measurement, spatial statistics and spatial forecasting. Students apply statistical concepts and the use of spreadsheet computer software. (P)

Prerequisite: STA 2023 or instructor permission.**Attributes:** General Education - Physical Science**GEO 3222 Sea Level Science 3 Credits****Grading Scheme:** Letter Grade

Explains how sea level changes in space and time. Topics include methods for measuring sea level, the causes of sea level change such as tides, storms, and climate, future projections of sea level change, and resulting impacts.

Prerequisite: GEO 2200 or GLY 2010C or instructor permission.**GEO 3250 Climatology 3 Credits****Grading Scheme:** Letter Grade

Genesis of regional climates and their global distribution. Emphasis on world regional climatology. Secondary topics include applied climatology and climate change. (P)

Prerequisite: MET 1010 or GEO 2200 or GEO 2242.**Attributes:** General Education - Physical Science**GEO 3280 Principles of Geographic Hydrology 4 Credits****Grading Scheme:** Letter Grade

Examines the effects of physical geography on the land-based portion of the hydrologic cycle at the regional and basin scales. Includes discussion of precipitation, infiltration and runoff. (P)

Prerequisite: GEO 2200 or instructor permission;**Corequisite:** GEO 3162C.**Attributes:** General Education - Physical Science**GEO 3315 Hungry Planet: Global Geographies of Food 3 Credits****Grading Scheme:** Letter Grade

Studies the biological structure, means of survival, propagation and distribution of plants, with emphasis on their relationship to the culture and diffusion of man throughout the world and his part in their development and improvement. (B)

Attributes: General Education - Biological Science**GEO 3334 Managing for a Changing Climate 3 Credits****Grading Scheme:** Letter Grade

Interdisciplinary survey of climate variability and change. Topics include the physical science basis for climate change, sectoral analysis of climate impacts, adaptation, and mitigation options. Active learning, discussions, and roleplaying facilitate understanding of critical issues facing the human and natural world.

Prerequisite: GEO 2242 or GEO 2200.**Attributes:** General Education - International, General Education - Physical Science**GEO 3341 Extreme Floods 3 Credits****Grading Scheme:** Letter Grade

Examines the world's most extreme floods from the Pleistocene through present due to various causes. Discusses physical and human aspects of flood warning, preparedness, response and recovery throughout the world. (N and P)

Attributes: General Education - International, General Education - Physical Science

GEO 3343 Extreme Droughts 3 Credits

Grading Scheme: Letter Grade

Examines droughts, particularly hydrologic droughts and drying rivers, and declining water resources. Assesses biophysical, socio-economic consequences when the quantity or quality of water is limited and/or decreasing through case studies in different environments (rivers, lakes, groundwater, etc.) and countries through data analysis and projects.

Prerequisite: Junior or senior standing.

GEO 3352 The Human Footprint on Landscape 3 Credits

Grading Scheme: Letter Grade

Studies human-environment relationships from a primarily geographic perspective, focusing on the human forces that shape landscapes.

GEO 3372 Conservation of Resources 3 Credits

Grading Scheme: Letter Grade

Surveys natural resources and a study of wise and wasteful practices of these resources. Satisfies resource certification for social studies teachers.

Prerequisite: sophomore standing or higher or instructor permission.

GEO 3427 Plants, Health and Spirituality 3 Credits

Grading Scheme: Letter Grade

Issues and controversies surrounding organic food, genetically-modified crops, medicinal plants, plants used to achieve altered states of consciousness and the importance of ornamental plants as inspiration for artists and in worship.

GEO 3430 Population Geography 3 Credits

Grading Scheme: Letter Grade

Geographical analysis of populations, including population description, distribution, change and characteristics; demographic processes; and the consequences of development, conflict and population control diseases. (S)

Attributes: General Education - Social Science

GEO 3452 Introduction to Medical Geography 3 Credits

Grading Scheme: Letter Grade

Medical geography deals with human-environment interactions and the influence of these interactions on public health. Provides a broad and comprehensive survey of geographic approaches in medical studies. (B)

Prerequisite: sophomore standing or higher; entry-level knowledge of statistics (STA 2023 or GEO 3162C or equivalent) recommended.

Attributes: General Education - Biological Science

GEO 3454 Peoples and Plagues 3 Credits

Grading Scheme: Letter Grade

Introduces emerging infectious diseases (EIDs) in the context of previous outbreaks, focusing on geography, origin, and management response. Explores basic models of infectious diseases processes, transmission cycled, and life-histories of host-vector systems, and the ecological and landscape conditions that favor emergence.

Prerequisite: sophomore standing.

GEO 3502 Economic Geography 3 Credits

Grading Scheme: Letter Grade

A comprehensive geographical survey of major economic activities such as agriculture, forestry, fishing, mining, manufacturing and commerce. Emphasizes the study of the characteristics of distribution and the regional patterns of these activities. (S) (WR)

Attributes: General Education - Social Science, Satisfies 6000 Words of Writing Requirement

GEO 3602 Urban and Business Geography 3 Credits

Grading Scheme: Letter Grade

Empirical and theoretical spatial analysis of the various economic, population and social facets within and between urban settlements.

Prerequisite: sophomore standing or instructor permission.

Attributes: General Education - Social Science, Satisfies 6000 Words of Writing Requirement

GEO 3611 Housing, People and Places in a Spatially Diverse America 3 Credits

Grading Scheme: Letter Grade

Examines the housing, people and places that comprise the diverse contemporary human settlement patterns in the U.S. Topics focus on the quality of life found in the housing and neighborhoods of these urban and rural landscapes. (S and D)

Attributes: General Education - Diversity, General Education - Social Science

GEO 3803 Geography of Alcohol 3 Credits

Grading Scheme: Letter Grade

Origins and fission of alcoholic beverages and associated crops on a global scale.

GEO 3930 Special Topics 3 Credits

Grading Scheme: Letter Grade

Rotating topics in geography.

GEO 4024C Terrorism and Space 4 Credits**Grading Scheme:** Letter Grade

Critically discusses the dual concerns for geography as an influence on and a source of terrorism. Presents the origins of contemporary terrorism as well as the various motivations of ideologically-oriented, ethno-nationalist, and religious organizations. Examines how a spatial approach can contribute to better understand the diffusion of terrorist organizations across the world, with a particular focus on Africa.

Prerequisite: Any course with a GIS prefix.**GEO 4033 Climate Change and Health 3 Credits****Grading Scheme:** Letter Grade

Presents the science of climate change and impacts on health. Discussion builds on core concepts of climate change science to examine a variety of topics from acute impacts such as heat waves and other weather extremes to chronic conditions like degraded air quality. Mitigation and adaptation strategies are also discussed.

Prerequisite: GEO 2200 or GEO 2242 or MET 1010 or permission of instructor.**GEO 4034 Weather, Climate, and Society 3 Credits****Grading Scheme:** Letter Grade

Investigates social vulnerability to hazards, disasters, and climate change through perspectives and experiences of vulnerable population segments who often bear brunt of losses yet exhibit remarkable flexibility and creativity in coping and adapting to environmental risks. Introduces census data and spatial analysis to understand geographies of social vulnerability

Prerequisite: GEO 2006 or GEO 2200 or GEO 2242 or GEO 2420 or GEO 2410 or GEO 3430.**GEO 4167C Intermediate Quantitative Analysis for Geographers 3 Credits****Grading Scheme:** Letter Grade

Surveys various multivariate techniques commonly used to analyze geographic data. Emphasis on hypothesis testing, inference, multiple regression, analysis of variance and cluster analysis. Introduces time-series regression and grouped estimation procedures, factor analysis, probit/logit modeling and trend-surface interpolation. (WR)

Prerequisite: GEO 3162C or the equivalent.**Attributes:** Satisfies 6000 Words of Writing Requirement**GEO 4169 Spatial Econometrics and Modeling 3 Credits****Grading Scheme:** Letter Grade

Introduces regression models capable of dealing with spatial auto-correlation; develop statistical models and estimate with computer software.

Prerequisite: GEO 4167C or equivalent.**GEO 4170 Communicating Science in the Geosciences 3 Credits****Grading Scheme:** Letter Grade

Examines techniques to communicate scientific knowledge and research to non-science audiences. Topics include quantitative and qualitative research methods, using narrative, discussing data and statistics, risk communication, and communicating with journalists and politicians. Readings, discussions, and projects facilitate understanding of best practices when communicating to people making evidence-based decisions.

Prerequisite: Any Gen Ed Biological or Physical Sciences course.**GEO 4281 River Forms and Processes 3 Credits****Grading Scheme:** Letter Grade

Examines the nature and variety of fluvial processes and the origin and modification of fluvial landforms. Includes discussion of environmental changes in rivers and human activities in drainage basins.

Prerequisite: GEO 2200 or GLY 2010C, or instructor permission.**GEO 4285 Water, Risk, and Extreme Events 3 Credits****Grading Scheme:** Letter Grade

Investigates techniques for evaluating the risks of extreme events related to water in our environment. Presents data and methodologies for estimating the rarity of phenomena including excessive rainfall totals, high and low river levels, coastal storm surge and waves, and drought.

Prerequisite: GEO 3162C or STA 3032 or permission of instructor.**Attributes:** Satisfies 6000 Words of Writing Requirement**GEO 4300 Environmental Biogeography 3 Credits****Grading Scheme:** Letter Grade

Description and explanation of spatial patterns of biodiversity and the underlying biophysical factors of human-environment interactions. Investigates past and present distributions of organisms and how patterns of environmental variation influence organisms. How biogeography is used to design nature reserves and how forecasting climate change may affect organisms and explain human adaptations to environmental variability.

Prerequisite: Any Gen. Ed. P or B course.**GEO 4306C Geography of Vector-borne Diseases 3 Credits****Grading Scheme:** Letter Grade

Introduces the spatial epidemiology of vector-borne diseases (VBDs) and geospatial methods for monitoring, mapping and modeling them. Provides hands-on experiences for mapping and modeling risk of VBDs via GIS-based labs.

Prerequisite: GEO 3452 or GIS 3043 or permission of the instructor.

GEO 4554 Regional Development 3 Credits

Grading Scheme: Letter Grade

The problems of regional development and regional growth within the context of economic, political and spatial relationships. (S) (WR)

Prerequisite: junior or senior standing.

Attributes: General Education - Social Science, Satisfies 6000 Words of Writing Requirement

GEO 4612 Shelter and Care Options for U.S. Elderly 3 Credits

Grading Scheme: Letter Grade

Examines the strengths, weaknesses and demand for housing and care alternatives addressing the needs of both active and frail American elderly persons.

Prerequisite: refer to the department.

GEO 4700 Transportation Geography 3 Credits

Grading Scheme: Letter Grade

Introduces the history and evolution of transportation systems, and essential concepts, theories, and topics in transportation geography, such as spatial organization, economic foundations, urban form, major modes, globalization, and environmental impacts. Also covers network representation of transportation systems, basic network measures, and challenges for transportation geography.

Prerequisite: Sophomore standing or higher.

GEO 4905 Individual Work 1-5 Credits

Grading Scheme: Letter Grade

Qualified students and the instructor concerned may choose a particular topic or problem for study.

Prerequisite: undergraduates only with 9 credits of geography and instructor permission.

GEO 4911 Undergraduate Research in Geography 0-3 Credits

Grading Scheme: Letter Grade

Provides firsthand, supervised research in Geography. Projects may involve inquiry, design, investigation, scholarship, discovery or application in Geography.

GEO 4930 Senior Seminar 1 Credit

Grading Scheme: Letter Grade

Integrates geographic concepts for graduating seniors; provides introduction to professional geography for students entering the job market.

Prerequisite: geography seniors only.

GEO 4938 Selected Topics in Geography 1-4 Credits

Grading Scheme: Letter Grade

Rotating geography topics.

GEO 4944 Internship 1-10 Credits

Grading Scheme: Letter Grade

Experimental learning in position with city, county, regional and state government agencies.

Prerequisite: senior standing.

GEO 4970 Honors Thesis 3 Credits

Grading Scheme: Letter Grade

Completion of an honors thesis that meets department specifications during the semester in which the student is enrolled.

Prerequisite: senior standing and participation in department honors program.

GIS 2002 The Digital Earth 3 Credits

Grading Scheme: Letter Grade

Focuses on how the Earth's surface is visualized, explored, and analyzed in digital formats (e.g. maps, satellite images, aerial photos). Provides an introduction to fundamental concepts of digital geographic data to understand the Earth environment and human society based on the vast quantities of geographic information in our ever-changing world.

GIS 2114 The World & Big Data 3 Credits

Grading Scheme: Letter Grade

Data drives today's world and over 80% of that data is geographic. Increasing volume and varying formats of these geospatial big datasets have posed new challenges. Introduces relevant concepts (e.g., 5 V's) and techniques (e.g., cloud computing) of big (spatial) data as well as its applications in the real world. Hands-on experiences with Volunteered Geographic Information (VGI), analyzing geotagged tweets, and visualizing spatial datasets.

GIS 3001C Spatial Maps and Graphs 4 Credits

Grading Scheme: Letter Grade

Analyzes cartographic problems with exercises in techniques of presentation, including map projections and symbols and problems in statistical representation by graphic methods.

Prerequisite: sophomore standing or above.

GIS 3043 Foundations of Geographic Information Systems 4 Credits**Grading Scheme:** Letter Grade

Geographic Information Systems (GIS) as the technology for creation, modification, display and analysis of spatial information. Develops knowledge of GIS, competence in geographic databases and familiarity with computer software and hardware.

Prerequisite: GEO 2200, GEO 3162C and 2000-level human geography course.**GIS 3420C GIS Models for Public Health 3 Credits****Grading Scheme:** Letter Grade

Focuses on the design of GIS-based models to address health and healthcare issues. Topics include a conceptual framework, landscape epidemiology models, disease diffusion models, health accessibility, human health behavior and location-allocation of health services. Laboratory section provides hands-on experience applying these models with GIS tools.

Prerequisite: GIS 3043 and (STA 2023 or GEO 3162C).**GIS 4021C Aerial Photo Interpretation 3 Credits****Grading Scheme:** Letter Grade

Principles of aerial photography, identification and interpretation of physical and cultural features, sketching and simple map-making, and uses of aerial photography.

Prerequisite: GEO 2200 or instructor permission.**GIS 4037 Digital Image Processing 4 Credits****Grading Scheme:** Letter Grade

Introduces the theory and application of digital imagery data in geographical research with a hands-on, lab-based approach.

Prerequisite: Junior or Senior Standing.**GIS 4102C GIS Programming 3 Credits****Grading Scheme:** Letter Grade

Introduces basic programming concepts; instruction in popular programming languages for geospatial processing, applications, and modeling in ArcGIS environment.

Prerequisite: GIS 3043C or equivalent.**GIS 4113 Introduction to Spatial Networks 3 Credits****Grading Scheme:** Letter Grade

Many phenomena of interest in physical, social and cyber environments can be thought of as networks within geographic context. Teaches methods for analyzing these spatial networks, and introduces their applications in geography, transportation, hydrology, epidemiology, social science, etc.

Prerequisite: Entry level knowledge of statistics or instructor permission. Prior experience with ArcGIS is preferred.**GIS 4115 Applied Geostats 3 Credits****Grading Scheme:** Letter Grade

Introduces fundamentals and practices of advanced geostatistical analysis (kriging), which addresses optimal spatial interpolation. Geostatistics are currently applied in diverse disciplines such as geography, geology, engineering, hydrology, urban studies and epidemiology.

Prerequisite: (STA 2023 or GEO 3162C or equivalent) and GIS 3043 or equivalent or instructor permission.**GIS 4123C GeoAI – Geographic Artificial Intelligence 3 Credits****Grading Scheme:** Letter Grade

Integration of Geography and AI, or GeoAI (a subfield of spatial data science), provides novel approaches for addressing a variety of geospatial problems in the natural environment and our human society. Hands-on computing labs using real-world geospatial data to address such AI topics as: image classification, object detection, scene segmentation, simulation and interpolation, retrieval and question answering, on-the-fly data integration, and geo-enrichment.

Prerequisite: Any 3000 level or higher GIS prefix course [GIS3XXX, GIS4XXX] or permission of instructor.**GIS 4124 Geocomputation using R Programming 3 Credits****Grading Scheme:** Letter Grade

Introduction to geodata analysis using programming. Broad introduction to the programming language as well as applied spatial data analysis.

Facilitates students' use of programming to analyze data of their own choosing on a final project. Code sharing and re-use is highly emphasized, as is collaboration.

Prerequisite: Any 3000 level or higher GIS prefix course or permission of instructor.**GIS 4324 GIS Analysis of Hazard Vulnerability 3 Credits****Grading Scheme:** Letter Grade

Geographic and cartographic techniques for geospatial analysis of risk, vulnerability, and resilience using ArcGIS. Learn to utilize physical and human geographic datasets for multiple hazard contexts including hydrometeorological, climatological, and geophysical hazards.

Prerequisite: GIS 3043 or URP 4273 with minimum grade of C.**GIS 4424C Applications in GIS for Zoonoses and Disease Ecology 3 Credits****Grading Scheme:** Letter Grade

Focuses on GIS applications in spatial analysis and ecology to address common research issues related to zoonotic diseases which affect animals and humans.

Prerequisite: GIS 3043 or GIS 3420C, or equivalent.

GIS 4500 Population GIS 3 Credits

Grading Scheme: Letter Grade

Instruction on geographic and cartographic techniques for geospatial analysis of population, demographic, and socioeconomic data using ArcGIS Pro. Students identify and utilize current and historical secondary population data sources for GIS analysis of population changes, and for mapping of segregation, inequality, and well-being indicators.

Prerequisite: GIS 3043 or GIS 3001C or URP 4273 with minimum grades of C, or GEO 3430 or SYD 4020.

GIS 4911 Undergraduate Research in Geospatial Trends 0-3 Credits

Grading Scheme: Letter Grade

Provides firsthand, supervised research in Geospatial Trends. Projects may involve inquiry, design, investigation, scholarship, discovery or application in Geospatial Trends.

GLY 4734 Coastal Morphology and Processes 3 Credits

Grading Scheme: Letter Grade

Examines the nature and variety of coastal processes, and the origin and modification of environmental changes along coasts, including human activities in the coastal zone.

Prerequisite: GEO 2200 or GLY 2010C or GLY 2030C.

MET 1010 Introduction to Weather and Climate 3 Credits

Grading Scheme: Letter Grade

A course for non-science students interested in understanding the phenomena of daily weather. Several principles of physics are introduced. (P)

Prerequisite: high school algebra.

Attributes: General Education - Physical Science

MET 3300 Atmospheric Dynamics 3 Credits

Grading Scheme: Letter Grade

Covers the principles of physics that govern atmospheric behavior. Dynamic introduces the equations that express the fluid dynamics principles for the atmosphere and the ways of simplifying, interpreting, and applying those equations to understand observed atmospheric motions, particularly on synoptic scales.

Prerequisite: MAC 2312 and PHY 2048

MET 3503 Weather and Forecasting 3 Credits

Grading Scheme: Letter Grade

Provides hands-on experience using weather instruments and making forecasts.

Prerequisite: GEO 2242 or MET 1010 or GEO 2200.

MET 3753 Pragmatic Python for Weather 3 Credits

Grading Scheme: Letter Grade

Provides a fundamental understanding of the Python programming language with a core focus on ingesting, displaying, and analyzing observational meteorological data and numerical weather model data.

Prerequisite: MET 1010 or GEO 2242;

Corequisite: MET 3573.

MET 4230 Thermodynamics of the Atmosphere 3 Credits

Grading Scheme: Letter Grade

Detailed survey of atmospheric thermodynamics, which deals with energy transfers and processes involving moisture and stability that affect atmospheric motions and weather systems. Lecture material reinforced and supplemented through lab exercises. This topic is for those who intend to pursue a profession in meteorology, physics, atmospheric/climate science, or engineering.

Prerequisite: MET 3503 and CHM 2045 and MAC 2312 and PHY 2048/L with minimum grades of C.

MET 4410 Radar and Satellite Meteorology 3 Credits

Grading Scheme: Letter Grade

Overview of radar and satellite remote sensing as used in the atmospheric sciences, including the principles of atmospheric radiative transfer, the retrieval of atmospheric variables, and emphasis on geospatial interpretation of imagery for different weather systems.

Prerequisite: PHY 2049 and MET 3503.

MET 4450 Atmospheric Physics 3 Credits

Grading Scheme: Letter Grade

Technical and theoretical evaluation of radiative and microphysical properties of the atmosphere, clouds, and precipitation. Course includes radiative transfer processes fundamental to Earth's climate system, and key hypotheses regarding the development of cloud and precipitation, using mathematical principles to understand how droplets condense and grow.

Prerequisite: MAC 2312 with minimum grade of C and CHM 2045 with minimum grade of C and PHY 2048L with minimum grade of C and MET 3503 with minimum grade of C.

MET 4500C Synoptic Meteorology 4 Credits**Grading Scheme:** Letter Grade

Comprehensive survey of mid-latitude storm systems using conceptual and theoretical frameworks established through lecture material, and application of these concepts through immersive labs. Content includes atmospheric circulation, mid-latitude cyclones, fronts, jet streams, winter weather and severe storm environments. Appropriate for students seeking a career in atmospheric science or related field.

Prerequisite: MET3503 and CHM 2045 and MAC 2312 and PHY 2048/L with minimum grades of C.**MET 4524 Weather Briefing 1 Credit****Grading Scheme:** S/U

Learn to prepare and present a daily weather briefing. Briefings will demonstrate the ability to synthesize weather information on all scales, prepare a forecast, and communicate this clearly and succinctly to an audience.

Prerequisite: MET 4500C with a C grade or better.**MET 4531 Mesoscale Meteorology 3 Credits****Grading Scheme:** Letter Grade

Covers the major dynamic and thermodynamic processes of the atmosphere that govern the structure, development, and evolution of weather systems generally smaller than those of the synoptic scale.

Prerequisite: MAC 2312 and PHY 2048 and MET 4500C.**MET 4532 Hurricanes 3 Credits****Grading Scheme:** Letter Grade

Meteorological and climatological concepts related to hurricanes. Forecasting current activity, researching past storms and analyzing storm structure, damage and future trends.

Prerequisite: MET 3503 or GEO 3250.**MET 4560 Atmospheric Teleconnections 3 Credits****Grading Scheme:** Letter Grade

Atmospheric teleconnections are recurring large-scale patterns of pressure and circulation anomalies. They can influence temperature, rainfall, storm tracks and jet stream location and intensity. Examines how these patterns were discovered, how the index that characterizes the phase of each teleconnection is calculated and the weather associated with different phases.

Prerequisite: MET 3503 or GEO 3250 with a minimum B- grade.**MET 4750 Spatial Analysis of Atmospheric Data using GIS 3 Credits****Grading Scheme:** Letter Grade

How atmospheric data are collected and analyzed for meteorologic and climatologic-scale research. Where various types of data are obtained and how to analyze data to answer specific research questions.

Prerequisite: GEO 3250 or MET 3503 or MET 4532**MET 4911 Undergraduate Research in Meteorology and Climatology 0-3 Credits****Grading Scheme:** Letter Grade

Provides firsthand, supervised research. Projects may involve inquiry, design, investigation, scholarship, discovery or application.
